Ajutine liiklusmärk vajadusel

An aerial photograph of a road construction site. The road is a two-lane asphalt road with a yellow center line. On the left side of the road, there is a large pile of dirt and some construction equipment. On the right side, there is a grassy area with some trees. A blue line with arrows at both ends indicates a 150m section of the road. In the center of the road, there are two red rectangular areas, each containing a yellow circle with a black dot in the center. These are likely temporary traffic signs or markers. There are also blue lines with arrows indicating a 3m section of the road. At the top of the image, there is a yellow triangular warning sign with a black border and a black symbol of a person walking. At the bottom of the image, there is a yellow triangular warning sign with a black border and a black symbol of a person walking. The overall scene is a construction site for a road improvement project.
