

The diagram illustrates the cross-section of the tunnel structure. On the left, a vertical elevation scale shows levels from 66m to 70m in 1m increments. The tunnel structure is shown with a central black line representing the main tunnel and green lines representing the side walls. Dimensions are indicated with blue lines and text: a 2m width for the top section, a 3.1m width for the bottom section, and a 1.5m height for the side walls. A note 'min. 1m' is present near the bottom right corner. A blue arrow points to the bottom right corner with the text 'Telia Eesti AS sügavus teadmata!'.
