### **Response to the request for explanation**

Estonian Data Protection Authority has received your request for:

- *Official guidelines, documentation, or PDF materials outlining the legal requirements for video surveillance;*
- *Any specific national rules or deviations from general GDPR principles;*
- *Requirements regarding signage, data retention, access control, and monitoring practices.*

In the use of cameras, we adhere to the GDPR and applicable data protection principles. In certain sectors, the use of cameras may also be governed by specific legislation.

Relevant information is publicly available. The website of the Data Protection Inspectorate includes a [section on cameras](#) addressing key issues. Extensive material for the organizer of video surveillance can be found [here](#). In addition, [guidance on the use of cameras](#) is available, summarizing the main legislation and practices.

Unfortunately, the material is not available in English, nevertheless, we hope that this will still be of assistance.

Respectfully

Gunnar Gabriel Einlo
