**Ministry of Culture response to PadelSport
Global – Estonia's Perspective in a 195-State
Global Digital Sport Network**

Dear Péter Bocskai,

Thank you for contacting us and for introducing the PadelSport Global initiative.

While Estonia has developed several digital solutions supporting the sports sector, the Ministry of Culture is not involved in the development, evaluation or governance of international private digital sport platforms of this nature. Therefore, we are not in a position to provide an official assessment of the concept or to participate in its further development.

As your inquiry specifically concerns sports information systems and digital infrastructure, you may wish to contact the Estonian Sports Training and Information Foundation (Spordikoolituse ja -Teabe Sihtasutus), which administers the Estonian Sports Registry. They are in the best position to discuss practical aspects related to sports information systems and digital solutions in the sports sector.

We wish you success in the further development of PadelSport Global.

Yours sincerely,

(signed digitally)

Raido Mitt
Undersecretary of Sports
Ministry of Culture
