Teema: Minister Sikkut, Estonia - Speaking Invitation - European Health  
Forum Gastein 2024

Dear Minister Riina Sikkut,

I wanted to follow-up our Invitation of earlier this year (attached), regarding your potential participation in the European Health Forum Gastein 2024. We would be honoured if you agreed to participate in our conference at the end of September in Austria, and would be happy to offer you the speaking and participation opportunities outlined in the attached Draft Agenda, including participation in our first conference plenary on Wednesday 25 September entitled Democracy and Health at the crossroads of Europe's future, as well as in a number of conference sessions and invitation-only policymaker meetings relevant to your interests taking place between the afternoon of Tuesday 24 September and Friday 27 September.

We will gladly work with your team to liaise on a final tailored programme for you based on your availability to ensure that you would make the most out of your trip to Austria: in addition to session speaking opportunities, we can facilitate bilateral meetings with other Ministers and/or senior representatives of international organisations, and involve you in a press conference and/or Q&A session with journalists.

Please let us know if you have any questions. In case we could already announce your tentative participation, we will be launching our conference programme and registration this week, and would be delighted to announce you as a high-level speaker!

With best wishes,  
Dorli Kahr-Gottlieb

DORLI KAHR-GOTTLIEB, MA  
Secretary General

Subject: Minister Sikkut, Estonia - Speaking Invitation European Health Forum Gastein 2024

Dear Minister Sikkut,

We would be honoured if you could join us in-person this autumn for the 27th European Health Forum Gastein, taking place from 24 - 27 September in Bad Hofgastein and online under the theme of .

These 3D megatrends have wide-ranging implications for the health of our societies and healthcare systems, and shape the sustainability of the health landscape. It is crucial to adapt and harness the opportunities they offer while addressing their respective challenges, by co-creating long-term sustainable policies with actors across all sectors that support health and well-being. We would be delighted if you could join us to represent Estonia on the European health policy stage and discuss solutions to address the complex interplay of democracy, demographics, and digitalisation.

Please find attached a personal invitation. We would be happy to explore speaking opportunities for you during our conference sessions, and to facilitate bilateral meetings with other ministers and senior delegates from international organisations.

I look forward to your reply. Please do not hesitate to contact me or my colleague Senior Advisor Louise Boyle (in copy) for any further information.

With best wishes,

Clemens Auer

DR CLEMENS MARTIN AUER  
President
