Hello,

At first I would like to introduce myself – I am Danas Kazlauskas, and I work as an IT solution architect in Lithuanian State Forest Enterprise (VMU).

And let's go straight to the business: our company has a requirement - to create or buy mobile application (Android, iOS) for recreational objects: user should be able to see VMU managed recreational objects across all Lithuania with description, photos, and underlying layers of maps, and offline mode is also required. As I know, you have similar application, which could match our requirements:

<https://rmk.ee/rmk-mobiilirakendus/>

We have announced the market consultation till 05/02/2026 16:00 – please take a look:

<https://viesiejipirkimai.lt/epps/pmc/viewPmc.do?resourceId=6299678>

I would like to invite you to participate in this market consultation and in tender which will come after it.

And if you have any documents or presentations specifically about **RMK mobiilirakendus**, could you share it with us? We would like to know more functional and technical details about it.

Thank you in advance.

**Danas Kazlauskas**
