Our 18.02.2025 No 10.1-3/24/7-3

**Response to letter nr. 2.4.4.-1./9044**

On 12th of December 2024 the Estonian Health Board received letter nr 2.4.4.-1./9044 from Health Inspectorate of the Republic of Latvia concerning the distribution of calcium chloride without REACH registration by Estonian importer Taproban OÜ.

We carried out the procedure and found that companies “TCI Sanmar Chemicals”, South Port Said, Egypt, and “Life Chemical Group (LCG)” both have appointed only representatives and in both cases the imported calcium chloride has been registered with ECHA. Therefore no violation of European Union Regulation No. 1907/2006 was detected.

Based on the information mentioned above, we have concluded the procedure.

Kind regards,

Elisabeth Randoja  
Inspector  
Northern Regional Department
