

# **Agenda for Data and Evidence Webinar**

**Date: 11 February, 11:00 CET**

90 minutes

## **Introduction**

The **Data & Evidence** webinar will focus on how assessment data informs health security planning.

During the webinar WHO tools and guidance on assessment data will be presented by WHO technical teams, while various countries will be demonstrating how this data can inform various national planning processes from their national perspective, by presenting real examples of in how this tool has supported/guided the development or update of health emergencies preparedness, readiness and response plans.

## **Agenda**

- 1) **Opening.** Purpose of meeting, Prep 2.0 framework, EPW2, introduction to concept do data for health security - (WHO Europe 5 mins)
- 2) **Country presentations** – Five mins introducing tool. Ten mins country presenting tool use and five min Q&A

<b>Presenter</b>	<b>Tool</b>	<b>Country/Area</b>
a. Mark Katz	Unity Studies (vaccines)	Kosovo
b. Peter Hoejskov	EWAR	Armenia
c. Carlos Mansilla	Strategic Risk assessment tool	Cyprus
d. Sandra Lindmark	IHR MEF (SPAR, JEE, SimEx AAR)	TBC

- 3) **Discussion of Key Questions** (if time allows 5 mins)
  - a. When planning for health security, what good practices, challenges and lessons learned have Member States encountered when generating or utilizing data or information asked for in preparedness and prevention planning and investments?
  - b. How much data needs to be local / national and how much international?
  - c. What and how much data is needed/used for what type of plan and how can we avoid duplication and overlaps?
