**Recommendation Letter in support of
Pirje Orasson's application to the MESGO
programme**

Dear Members of the Admissions Committee

The Ministry of Culture of the Republic of Estonia hereby expresses its support for the application of Pirje Orasson to the MESGO, Executive Master in Global Sport Governance programme.

From the Ministry's perspective, the continued development of the Estonian sports system depends on strong governance capacity, international awareness, and the ability to translate strategic priorities into effective practice. Pirje Orasson has demonstrated these qualities in her professional work. She combines a well-developed understanding of the sport sector with a thoughtful and structured approach to cooperation, planning and implementation.

We consider MESGO to be a highly relevant programme for professionals who contribute to the long-term development of sport governance. Participation in this programme would further strengthen Pirje Orasson's capacity to address complex issues in a changing international environment and to bring comparative knowledge and new perspectives into the Estonian context.

We are convinced that she would approach the programme with seriousness, intellectual curiosity, and a clear sense of purpose. Her participation would not only support her own professional advancement but would also create broader value through the application of acquired expertise in the development of Estonia's sport sector.

The Ministry of Culture of the Republic of Estonia supports Pirje Orasson's admission to the MESGO programme.

Yours sincerely,

Raido Mitt
Deputy Secretary General for Sport
