**Subject:** Filming Permit at Lahemaa National Park // ANDALUCÍA POR EL MUNDO

---

Dear Lahemaa National Park,

I am Javier Domínguez, Associate Producer of "[Andalucía por el Mundo](#)", a Spanish TV programme that has been capturing the lifestyle of Andalusian expats around the world for more than 15 years.

The programme is about people and families that have settled in different cities and it is also a way to promote socially and culturally those places. Our **goal** is to showcase the destination's history and traditions, nature and wildlife, food, people and lifestyle.

We are visiting **Tallinn** in **mid-June 2025** and we have the support of **Visit Tallinn** for our project.

Our hosts have strongly recommended to visit **Lahemaa National Park** as it is one of their favourite natural spots in Tallinn's surroundings. We would like to feature in our show the native forests and its rocky and sandy beaches as well as its diverse wildlife. We would love to have a hike in order to capture this experience on camera.

Therefore we would like to arrange a filming permit at its premises, please.

We are a **micro-production** due to the small size of the project's footprint and minimal impact of the filming activity. We work with **basic technical equipment and only a three-people crew**. We do not use lighting equipment nor drones or tripods. We will not disturb the routine of the park, its staff nor other visitors.

**Lahemaa National Park - ANDALUCÍA POR EL MUNDO**

- **Production date:** TBC [from 13th - 20th June]

- **Production times:** TBC

- **Nº Crew:** 3 people

**Reporter:** Luis Márquez

**Camera Operator:** Javi Murillo

**Host:** TBC

We are still finalising the details of our visit and **I will update you on the specific locations, date and estimated times of our production in due course**. In the meantime, we would like to know what is required for gaining access and arranging a filming permit.

We are very flexible and we can adapt our filming to your requirements. We are used to filming in natural parks and reserves and we have recently worked at Springbrook National Park (Queensland, Australia), Mount Maunganui (Tauranga, New Zealand), Niagara Falls State Park (USA) and Seven Sisters Country Park (East Sussex, England) among others.

Should you have any questions, do not hesitate to let me know.

Many thanks and regards,

**Javier Dominguez Reguero**

Associate Producer - Medina Media
