

Lisa 2 Tehniline kirjeldus

Pakutav lahendus ja teenused peavad vastama riigihanke "ABC väravate rent, paigaldus ja haldus" (211844) tulemusel poolte vahel 24.07.2020 sõlmitud raamlepingu nr 3-3/2722 lisale 2 „Tehniline kirjeldus“.

1. Renditav vara: 16 ABC väravat, 6 värava operaatori tabletti, Gate management tarkvara 6 tabletile, Gate management tarkvara 4 statsionaarsele töökohale, Gate management server tarkvara paigaldamiseks 2 andmekeskusse, Gate monitoring server tarkvara paigaldamiseks 2 andmekeskusse ja kõik lahenduse toimimiseks vajalikud litsentsid.

2. Paigaldus: 16 ABC väravat (8 Narva piiripunktis, 8 Tallinn Lennujaamas). Sisaldab ABC väravate integratsiooni piirikontrolli süsteemiga ja terviktestimist enne väravate paigaldamist.

Paigaldus sisaldab endas ka ABC väravate koolitust:

Training contents and schedules being performed by vendor:

Part 1 – Theoretical background (~ 3-4 hours, up to 10 participants)

- *Overview ABC system and related police systems (non-technical)

- *The automated border control process

- *Monitoring application – the toolkit for the border guards

- *How to work with the ABC system – standard process and exceptional situations

Part 2 – Practical playground (~2 hours)

- *Using the real ABC system but without passengers around

- *Some of the officers act as passengers while the others do the border control

- *Officers get familiar with the monitoring application without “real” passengers

- *Simulations of exceptional situations possible (misuse of travel documents, pushing doors, trying to deceive the system, using emergency buttons etc.)

Part 3 – “Real” border control (~2 hours)

- *After opening the ABC system for real passengers, officers should be supported by experienced staff during the first hours of their shift

3. Hooldus ja tugi: Vastavalt raamlepingu nr 3-3/2722 lisale 2 „Tehniline kirjeldus“ p.11.1 nõuetele.
