Teema: EHR-based STI surveillance project - Expressions of interest for observing countries

Tähelepanu! Tegemist on väljastpoolt asutust saabunud kirjaga. Tundmatu saatja korral palume linke ja faile mitte avada.

To: EHR-STI surveillance project observers (Austria, Cyprus, Estonia, Germany, Norway, Spain)

CC: National Coordinators, National Focal Points for HIV/AIDS, STI and hepatitis B/C + Surveillance

--

Dear colleagues

As previously discussed, we are now preparing the second specific annual contract to support countries implementation or further development of Electronic Health Record (EHR)-based surveillance of Sexually Transmitted Infections (STI)- gonococcal infections, from March 2025.

With this email, we would like to invite you to become an active participant of the project next year allowing you to receive technical and financial support to produce a country-specific EHR-STI-Gono surveillance protocol (to deliver by end of 2025).

This work will be done with the support from the E-Sure consortium, led by Epiconcept and including Instituto Nacional de Saúde Doutor Ricardo Jorge [INSA-Portugal], Netherlands Institute for Health Services Research [NIVEL-Netherlands], and Statens Serum Institut [SSI-Denmark]. More detailed information about the project and its deliverables can be found (page 14 for the description of the surveillance protocol). A generic surveillance protocol, produced in an earlier phase of the project, may be useful to understand the aspects that should be covered.

Please let us know by 2 December 2024 if you would like to work on this protocol, and we will be happy to set up a meeting to discuss the financial support available.

Best regards
For the eHealth-based surveillance team at ECDC
Carlos Carvalho
