Good day,

I hope this email finds you well.

We are pleased to invite you to a webinar on November 27, which will profile the medical transport sector, encompassing both urgent and non-urgent services. Five leaders from the emergency medical services field will discuss operational realities across various regions, with a particular focus on quality management practices in delivering effective care. The webinar will be conducted in French, with simultaneous interpretation available in English.

Please share this invite with your colleagues and other relevant contacts to join us for this informative session. You can simply forward them the email below.

Regards,

Kirill Kornilov International Market Development Manager

Ottawa | Toronto | Montréal | Brussels  
Cell &#43;1-514-233-7510 |

We recognize and celebrate the diverse cultures and communities around the world working towards health care quality for all.

Join us for an informative webinar that will provide a detailed overview of the medical transport sector, whether urgent or non-urgent. Five leaders in the emergency medical services field will explore operational mechanisms across various regions, including air and ground transportation, emphasizing the vital role of quality management practices in delivering effective care. Rejoignez-nous pour un webinaire informatif qui offrira un aperçu détaillé du secteur du transport médical, qu'il soit urgent ou non urgent. Cinq leaders dans le domaine des services médicaux d'urgence exploreront les mécanismes opérationnels dans diverses régions, y compris le transport aérien et terrestre, en mettant l'accent sur le rôle vital des pratiques de gestion de la qualité pour fournir des soins efficaces.

Join us for an informative webinar that will provide a detailed overview of the medical transport sector, whether urgent or non-urgent. Five leaders in the emergency medical services field will explore operational mechanisms across various regions, including air and ground transportation, emphasizing the vital role of quality management practices in delivering effective care.

This webinar aims to enhance best practices and understanding of medical transport as an essential component of pre-hospital care. By sharing diverse perspectives and concrete experiences, we hope to promote approaches aimed at improving patient safety, reducing risks, and advancing people-centred care.

The webinar will be in French with English simultaneous interpretation. Wednesday, November 27, 2024, from 3 to 4:30 am Brussels time
