The diagram illustrates a landscape cross-section with three distinct geological features:

- Kasvukiht (muld):** A cross-section of a depression or valley floor, showing a wavy, undulating surface with a pattern of small circles and dots, representing vegetation or soil texture.
- Segateraline liiv:** A rectangular area representing a linear sand ridge, filled with a pattern of small circles and dots.
- Moreen:** A rectangular area representing a moraine, filled with a pattern of diagonal lines and small circles.
