Collective Passports

Dear Mr Tanzer,

Thank you for your letter regarding the use of collective passports for UK school groups in the context of the Entry/Exit System (EES) and the European Travel Information and Authorisation System (ETIAS).

Estonia continues to recognise collective passports as a valid travel document for eligible UK school groups. Following the implementation of the EES, each traveller included in a collective passport will be registered individually in the system, using the collective passport number as the travel document number for the EES record.

In addition, all travellers may continue to cross the border using their individual passports, in accordance with the applicable entry requirements.

Yours Sincerely,

Janek Mägi
Head of Department
