B-6 - demonstration of formal technical complexes (Kata, Pahumse, Tuli).

Demonstrations of traditional formal technical complexes representing different styles of martial arts in individual performance without weapons.

The main principle in evaluating such performances is not to analyze intra-style mistakes, but to identify mistakes inherent in all styles (impaired coordination of movements, stability, balance, lack of concentration in movements, imbalance of the center of gravity, lack of concentration of force and control of actions, lack of fighting spirit, breathing, as well as gaze, facial expressions, rhythm, pronounced style handwriting, etiquette, simplicity or complexity of the technique).

All martial arts that have formal technical complexes (Kata) are eligible: Karate, Kung Fu, Taekwondo, etc.

Shooting is carried out with an air rifle at a distance of 10 m at a target and is carried out with three shots lying down from a rest

We are the only international organization that unites various martial arts into a separate sport. During international competitions, athletes in various martial arts can realise their potential by becoming a world champion and raise their ranking. If you wish, you can obtain licenses for the right to develop the sport in your country and a simplified procedure for re-certification for a Black Belt in our sport, with the right to conduct certification in your country. You can improve your status by taking advantage of new opportunities and global trends.

The convenient location of the World Championship in Poland allows European teams to join the competition. A wide variety of opportunities allows you to realize yourself in our sport and become the best, both as an athlete and as a president.
