
**ICD-11 Training for Interoperable Mortality
and Morbidity Reporting**

**Copenhagen, Denmark
9 - 13 November 2026**

**17 August 2026
Original: English**

Provisional Agenda

Day 1: WHO FIC Foundations and Digital Integration

- Introduction to WHO-FIC and ICD-11.
- ICD-11 coding principles and tools.
- Digital integration of ICD-11 in health information systems.

Day 2: Mortality Reporting and Digital Cause-of-Death Systems

- Mortality data workflows and reporting processes.
- ICD-11-based cause-of-death reporting.
- WHO digital tools for mortality data quality and analysis.

Day 3: Morbidity Reporting, Implementation Planning, and Monitoring

- Morbidity data workflows and reporting use cases.
- ICD-11 implementation planning and transition considerations.
- Introduction to iMINT (WHO-FIC Implementation and Information Tracker).

Day 4: Interoperability Context

- Interoperability concepts and digital health architecture.
- Governance and requirements for interoperable health data reporting.

Day 5: Standards and Semantic Interoperability

- Health data standards supporting interoperability.
- Terminology standards and semantic interoperability.
- Consolidation of the next national steps and closing discussions.
