LETTER OF INTEREST

Cumucore is a pioneer in private mobile networks (PMNs), delivering scalable and flexible 4G and 5G Standalone (SA) solutions for industrial, maritime, and critical communications. With a containerized core network, open APIs, and advanced features such as 5GLAN, TSN, and network slicing, we enable seamless integration with enterprise systems. Our focus on usability, eSIM support, and cost-effective deployments makes private networks accessible to a wide range of industries. Trusted by factories, mines, ports, and research institutions worldwide, Cumucore is driving the future of mobile connectivity and industrial automation.

We are proud to collaborate with xVentures Technologies to bring cutting-edge Private Mobile Network (PMN) solutions to the European market. PMNs are revolutionizing manufacturing, mining, logistics, healthcare, and other industrial sectors by providing highly reliable, low-latency, and secure connectivity tailored to mission-critical applications.

In light of this, we fully support xVentures Technologies' efforts to develop innovative solutions for this fast-growing market. We believe that through our collaboration, we can drive technological advancements, enhance operational efficiencies, and enable new business opportunities for enterprises adopting private mobile networks.

Sincerely, *Mika Skarp*

Mika Skarp
