Notification of Estonian eID schemes

Dear Mrs Virkkunen,

The implementation of the eIDAS Regulation across the EU is important in building trust in digital transactions and in reaching the full potential of the digital single market.

It is essential to enable EU people and businesses to use their trusted national eID means for digital authentication in online services across the EU and, by this, facilitate cross-border interoperability. Estonian eID functions meet the requirements for the highest possible assurance level according to the eIDAS Regulation.

Therefore, with this letter, we are pleased to initiate the notification process of the Estonian electronic identification scheme for Estonian ID card, residence permit card and diplomatic identity card. We hereby invite the Member States to participate in peer review, because we believe that this is significant for the notification process.

Yours sincerely

(Digitally signed)

Egert Belitšev
Director General
