

product info

article	2364			
raw-material	100 % pes (Coolmax/ Coolmax Fresh 50/ 50 %)			
weave	tuck pattern			
weight	120 g/m ²	tolerance ± 5 %		
width	150 cm			
care labelling TSL 23-901				
	Re-shape to dry			
dimensional change	test by Orneule: Adapted SFS-EN 5077, e-shape to dry, hang dry			
	max	length	%	width %
colour fastness to washing/SFS-EN ISO 105-C06	colour change min 4 EVS-EN ISO 105-C06, scale 1-5, adapted staining min 4			
colour fastness to light	colour change min 4 EVS-EN ISO 105-B01 staining min 4			
colour fastness to perspiration	colour change min 3 EVS-EN ISO 105-E04 staining min 3			
	<p>Coolmax is a special polyester (synthetic fiber) by Advansa. The fiber does not absorb moisture. It transfers moisture from the skin. This feature is based on the six-channel structure of the fiber which makes fiber surface are 20 % larger that that of regular polyester. This material contains Coolmax Fresh which has silver ions that makes it antibacterial and more comfortable. Do not use softeners!</p> <p>50 % six-channeled polyester 78/48 (Coolmax) 50 % six-channeled polyester 78/48 (Coolmax Fresh)</p>
