

中 华 人 民 共 和 国 大 使 馆

Note: 98/2025

The Embassy of the People's Republic of China in the Republic of Estonia presents its compliments to the Ministry of Justice and Digital Affairs of the Republic of Estonia and has the honor to inform your esteemed Ministry that the 2025 International Telecommunication Union (ITU) Council has made decision to hold the 2027 World Radiocommunication Conference (WRC-27) in Shanghai, China.

China highly values the important role played by the ITU in bridging the digital divide, promoting innovation and development in ICT, and facilitating the more equitable, rational, efficient and economical exploitation and utilization of radio-frequency spectrum and satellite orbit resources. China is committed to making greater contributions to the common development of global ICT.

Upon learning that no Member State had officially applied to host the WRC-27, China submitted an official application to host the conference to the ITU Council in 2024 and successfully passed the ITU's on-site inspection. To demonstrate China's sincerity and capability in hosting WRC-27 to Member States and to accumulate experience in hosting meetings of the ITU Radiocommunication Sector, Shanghai recently hosted a series of international meetings, including the meetings of ITU Radiocommunication Sector Working Parties 4A, 4B and 4C. The high-quality conference experience received full recognition from the participating delegates.

Shanghai is the center of science and technology, finance, innovation, culture, and transportation of China. It boasts well-established conference infrastructure and extensive experience in hosting large-scale international conferences. China is confident in presenting a splendid event for countries worldwide. China will earnestly fulfill its bid commitments, providing comprehensive and thoughtful conference services to all delegates, strictly complying with the ITU's requirements and relevant practices for hosting conferences, offering financial assistance to delegates from least developed countries to attend, and sparing no effort to create favorable conditions for all parties to fully participate in WRC-27.

In the near future, the ITU will solicit the opinions of its Member States regarding the decision of the hosting of WRC-27 in Shanghai made by the 2025 ITU Council. We hope that Estonian side will give full consideration to China's sincerity and efforts in hosting WRC-27, respond positively to the ITU, and support China's hosting of WRC-27.

The Embassy of the People's Republic of China in the Republic of Estonia avails itself of this opportunity to renew to the Ministry of Justice and Digital Affairs of the Republic of Estonia the assurances of its highest consideration.
