**Request for BRA ITS technical workgroup
meeting**

Dear Mr Boriss Jelisejevs

In connection with the near-term challenges in the development of Estonian ITS systems and according to earlier agreement to hold the next business visit in Riga, we would kindly like to conduct a technical meeting within the framework of the BRA ITS technical working group. We would like to exchange practical information in the field of traffic monitoring equipment, speed cameras, traffic management and the development of ITS-NAP. In the interests of optimal logistics, we ask the Latvian State Roads to organize a half-day meeting on 19.03.2025 in RIGA. From Estonia, a delegation of Estonian Transport Administrations ITS experts will attend the meeting. We hope that our proposal is suitable for you, and we will be happy to answer clarifying questions.

Yours sincerely

(Digitally signed)
Johann Peetre
