Teema: Partnership idea for the Ministry of Economic Affairs and
Communications - BrickLabs AI

Tähelepanu! Tegemist on välisvõrgust saabunud kirjaga. Tundmatu saatja korral palume linke ja faile mitte avada. Dear Sir or Madam, My name is Caleb, and I run BrickLabs AI, a technology company. Estonia's digital state is a reference point for governments everywhere, and I have been following the Ministry's work keeping that e-government model moving forward. I believe the right purpose-built tools could help your team go even further. What if we partner to build technology for the Ministry? BrickLabs handles all the technology: design, build, and maintenance. You handle access, adoption, and rollout inside your institution. We share revenue from what we build together. Would you be open to a short call in the coming weeks to explore what this could look like for MKM? Warm regards, Caleb Jephuneh, BrickLabs AI,
