

Annex 1: Overview of access to signals in travel-associated Legionnaires' disease (TALD) domain by country/organisation and user role

1. EpiPulse TALD domain items

All EpiPulse TALD domain items are categorised as signals and are formed on automated surveillance threshold rules. Information may be manually added to EpiPulse TALD domain items, such as ELDSNet TALD forms or item comments.

EpiPulse TALD domain items are either TALD single case signals or TALD cluster signals, according to definitions indicated in the ELDSNet TALD surveillance operating procedures:

<https://www.ecdc.europa.eu/en/publications-data/european-legionnaires-disease-surveillance-network-eldsnet-operating-procedures>

2. TALD item access levels

2.1 Role:

Accommodation country is the country where the associated accommodation site is geographically located.

Reporting country is a country that reported a diagnosed case of Legionnaires' disease associated to an accommodation site. EU/EEA countries, and selected nominated countries outside of EU/EEA based on a collaborative framework agreed with ECDC, may have permissions to report TALD cases through EpiPulse.

Informed is a country or an organisation informed about a TALD item.

Involved is a country or an organisation that is informed of TALD cases associated to vessels.

2.2 View:

Full view means personal data is available in views when logged-in to EpiPulse TALD domain.

Redacted view means no personal data is available in views when logged-in to EpiPulse TALD domain.

1. Users from EU/EEA countries

Role for item	Items	View	Notifications
Accommodation country	Single case or clusters – own country	Full (or redacted option)	Email with item link
Reporting country	Single case or clusters - worldwide	Full (or redacted option)	Email with item link
Informed country	Clusters only - worldwide	Redacted	None
Involved country (Vessels)	Single case or clusters - worldwide	Redacted	Email with item link

2. Users from Enlargement countries

Role for item	Items	View	Notifications
Accommodation country	Single case or clusters – own country	Full or redacted (subject to data agreement)	Email with item link
Reporting country*	Single case or clusters - own country or EU/EEA sites	Redacted	Email with item link
Informed country*	Clusters - worldwide	Redacted	None
Involved country (Vessels)	Single case or clusters – worldwide	Redacted	Email with item link

*under review process

3. Users from countries outside of EU/EEA

Role for item	Items	View	Notifications
Accommodation country	Single case or clusters – own country	Full or redacted (subject to data agreement)	Email with item link
Reporting country*	Single case or clusters - own country or EU/EEA sites	Redacted	Email with item link
Involved country (Vessels)	Single case or clusters – worldwide	Redacted	Email with item link

*under review process

4. Users from WHO organisation

Role for item	Items	View	Notifications
Communicate to IHR focal point for accommodation country	Single case or clusters – outside of EU/EEA for countries without nominated EpiPulse TALD users	Redacted	Email with item link and <u>redacted pdf attachment</u>
Involved (Vessels)	Single case or clusters – worldwide	Redacted	Email with item link and <u>redacted pdf attachment</u>
Informed	Single case and clusters – outside of EU/EEA	Redacted	Email with item link

5. Users from CARPHA organisation

Role for item	Items	View	Notifications
Informed*	Single case or clusters – in CARPHA countries & vessels	Redacted	Email with item link

*under review process
