WOMBAT TACTICAL BOONIE HATS

Our boonie hats are made for those, who prefer classic look during operations on the field. These hats are designed to provide comfort, excellent ergonomics and a little amount of shadow for the neck and face to be protected from sunrays and to help the wearer to disguise in the appropriate environment.

Features:

- Milspec webbing around the perimeter (bar tack stitches for excellent durability)
- Two ventilation holes to provide airflow
- Medium size brim, that's big enough to provide proper shadow for the neck and face while the edges will not get into the field of view too much

The Wombat Tactical boonie hats are field tested and re-designed several times to be the best friends of the operator. There is no secret; we keep the shape simple, while we pay attention to the details and use the best fabrics and materials just as we do regarding other garments in our assortment.

Available sizes (head perimeter – unit: cm):

53; 54; 55; 56; 57; 58; 59; 60; 61; 62 - smaller / larger sizes on special request

Type 1 Boonie hats

Type 1 models have no hardener part in their brim. Thanks to this they can be worn with earmuffs on the head without a problem while their weight is a bit lighter compared to Type 2 hats.

Type 2 Boonie hats

Type 2 models have hardened brim, therefore the shape of the hat remains the same for a longer time and it gives a more solid appearance to the headwear while this feature provides slightly better protection from environmental effects. (Embroidery or PVC label on request)

1. Wombat Tactical Boonie hats made of *Defender-M fabric*

Ten-Cate Defender-M fabrics are mil-spec variants of inherent flame retardant fabrics and we mostly have access to rip-stop version of them.

The fabric has been engineered with Lenzing FR® fibres, making it the most comfortable combat fabric in terms of breathability, moisture absorption and evaporation. This makes TenCate Defender™ M the best defence and tactical fabric around – one that simply cannot be ignored.

Suitable for application in protective clothing for naval forces, ground forces, air forces, special forces and law enforcement. This military combat fabric is already worn by the United States Army and United States Marine Corps.

Available colours and patterns: Multicam, Coyote Brown, Olive/Steingrau, Ranger Green, Wolf Grey, Navy blue, other unicolors and patterns. For actual information about availability regarding fabric type, colour and quantity, please send us an inquiry!

Material:

Main: 64% Lenzing FR, 24% Para-Aramid, 10% Polyamid, 2% Anti-Static

Webbing: 100% polyamide

2. Wombat Tactical Boonie hats made of *Finnish M05 fabric*

This fabric type we have access to is originated from a remainder stock of milspec materials of a UK manufacturer. It is extremely comfortable, durable and provides high-end feeling. Garments made from this fabric can withstand harsh weather conditions and have excellent crease resistance. Colour fastness is very good, and if these garments are washed properly, the texture and shades will remain perfect for a long time. For actual information about available quantity, please send us an inquiry!

Material (Cooltex fabric):

Main: 50% cotton 50% polyester, Twill weave, 275 gsm

Webbing: 100% polyamide

Material (IRR Spartan fabric):

Main: 50% cotton 50% polyamide Rip-stop, 210 gsm

Webbing: 100% polyamide

3. Wombat Tactical Boonie hats made of 65/35 polycotton fabric

Lightweight polycotton fabrics we can produce our garments of are made by distinct European companies and we did our best to choose the best options for this category.

Besides our currently stocked colours (Ranger green w/ twill weave and Black w/ rip-stop property) many other colours are available! With special requirements and needs, please send us an inquiry!

These fabrics are durable, their colour fastness is outstandingly good and thanks to their robust construction and crease resistance, these clothes can be used amongst harsh conditions for several purposes.

Material:

Main: 65% polyester, 35% cotton, Twill weave or Rip-stop property

Webbing: 100% polyamide

Stock colours: Black, Navy blue, Ranger green, Graphite grey, Sand, Mud brown

Custom colours: Olive drab, Olive grey, Coyote brown (MOQ on request)

For custom colours and printings please, send us an inquiry!

4. Wombat Tactical Boonie hats made of Ventile fabrics

Ventile is a well-known Swiss producer of premium quality goods made from 100% cotton providing outstanding comfort and weatherproof properties.

These distinct types of Ventile fabrics we can offer our garments made of are 200 gsm organic, 220 gsm rip-stop and 240 gsm organic.

Ventile fabrics are waterproof (750 mm water column) and thanks to their material, weave and construction, they are extremely durable and easy to clean while providing excellent comfort and outstanding quality. Garments made of Ventile fabrics are ideal for hiking, hunting and for any kind of outdoor activities thanks to their high-end material, extreme durability and weatherproof properties.

Material:

Main: 100 % cotton from Ventile

Webbing: 100% polyamide

Our production time depends on the chosen model types, required fabrics, colours, special requirements and the quantity needed.

As the producer of Wombat Tactical garments and accessories we determine the recommended retailer prices (RRP). Actual retailer prices are allowed to differ from the official RRP by the maximum rate of 15%.
