 Teema: Draft public health guidance to support the assessment and
 mitigation of the risk of locally acquired Aedes-borne viral diseases in
 the EU/EEA - Stakeholder consultation

Tähelepanu! Tegemist on väljastpoolt asutust saabunud kirjaga. Tundmatu

To: National Focal Points, Emerging and Vector-borne Diseases Network
 Cc: National Coordinators

Dear National Focal Points,

Due to the increasing number of locally acquired dengue cases in the past
 years in some southern European countries, and the geographic spread of
 invasive Aedes mosquito species in Europe, Aedes-borne viral diseases
 pose an increasing public health threat in the EU/EEA. To support the
 EU/EEA countries for surveillance, prevention and control of
 autochthonous cases of Aedes-borne viral diseases (predominantly dengue
 and chikungunya virus disease), ECDC has been working on the development
 of a public health guidance to support the assessment and mitigation of
 the risk of locally acquired Aedes-borne viral diseases in the EU/EEA.
 As part of the guidance development, ECDC organised an expert workshop
 between 16 and 18 April 2024 for consultation and active involvement of
 national experts from four EU Member States which have had autochthonous

dengue and/or chikungunya cases in the past twelve years (i.e., France, Italy, Spain and Portugal (Madeira)), as well as national experts from three at-risk countries (Greece, Belgium and Germany). The invited national experts have experience with the problems connected to autochthonous transmissions of dengue and chikungunya or other mosquito-borne viral disease outbreaks and the public health actions applied to control the outbreaks. Additionally, laboratory / virology experts and medical entomologists were invited to the workshop for topic-specific contributions.

Based on the inputs collated during and after the meeting a draft guidance was written, which we would like to share with you for consultation (i.e. to review, comment and suggest modifications). Some parts of the guidance are missing yet, which will be finalised in the coming weeks, but the most relevant parts are ready for consultation. The document is available at the ECON EVD NET site here:

Please put your comments into this document and use track changes in case you implement any modifications in the text. Please do not upload additional versions of the document with comments. Working on the same document will allow you to see the comments of others (i.e., you do not have to put the same comment if it was already put by someone else, and you can further comment others comments).

The draft guidance will be discussed at the annual EVD-Net meeting on 12 November (i.e., three weeks from today). It would be great if you could review and comment the document until the network meeting; however, it will remain open for comments for an additional week after the meeting. We plan to publish guidance by the end of 2024.

Should you not have access to the ECON site, please contact us by answering to this email.

We are looking forward to your valuable comments and suggestions.

Best regards,

Tamás Bakonyi
on behalf of the EVD team
