SMART MACHINES AND SYSTEMS  
AT THE SERVICE OF MANKIND

Estonian Entrepreneurship University of Applied Sciences  
12th annual Entrepreneurship and Innovation Conference (EIC)

## SMART MACHINES AND SYSTEMS AT THE SERVICE OF MANKIND

10th October 2024

Õpiku Conference Center, Ülemiste City, Tallinn, Estonia

### *Call for Papers*

You are invited to submit your research papers for publication and presentation consideration at the 12th Annual Entrepreneurship and Innovation Conference (EIC). Papers submitted to the conference can be short research papers that highlight the applicability of previous research findings to professionals, make available early research findings or survey results, or offer entrepreneurial insights. We also welcome submissions of detailed business case studies.

Smart machines and systems are transforming our world in every aspect of life. From automating routine tasks to enhancing decision-making processes, smart systems are disrupting traditional jobs and creating new ones. This conference will explore the potential limitations and threats, challenges and opportunities that arise as smart operational systems continue to proliferate and develop. Also, insights on how our society already has won and will potentially win in the future will be discussed.

This EIC conference is designed for professionals across various industries who are interested in learning about the latest developments in smart systems and machines, how these concepts will impact the future of work and life, society and environment. Attendees will include executives, managers, entrepreneurs, academics, and students. Whether you are a smart systems enthusiast or a sceptic, this conference will provide valuable insights into the role of new technologies and how it shapes our lives and world.

### *Areas of interest*

We invite researchers, practitioners, and students to submit original research papers, case studies, and position papers related to the following and other relevant topics:

- Ethical implications of smart systems
- Smart machines and the future of work
- Smart systems and creative work

ESTONIAN  
ENTREPRENEURSHIP UNIVERSITY  
OF APPLIED SCIENCES

- Smart systems and healthcare
- Adapting to change in the age of AI
- Internet of Things
- Artificial Intelligence
- Sensors and Actuators
- Edge Computing
- Big Data Analytics
- Cybersecurity
- Smart Grids
- Smart Cities
- Healthcare Technologies
- Autonomous Vehicles
- Smart Homes
- Industry 4.0 etc.

The conference will provide an opportunity for researchers and practitioners to share their insights and experiences, and to engage in discussions on the impact of smart systems and machines on our lives and the future of work.

We kindly invite you to submit the conference paper and share this information with your multidisciplinary and professional team.
