

## **Requirements for Ship Security Alert System**

In accordance with subsection 6 (1) of Regulation of the Government of the Republic of Estonia No. 39 of 24.03.2016 “Procedure for Provision and Receipt of Security Information of Ports, Port Facilities and Ships” the Estonian Police and Border Guard Board is receiver of the alert.

### **Maritime security centre (Joint Rescue Coordination Centre Tallinn - JRCC TALLINN)**

**Phone:** +372 619 1224

**E-mail:** [jrcc@politsei.ee](mailto:jrcc@politsei.ee)

Security Alert System (SSAS) installed on board shall comply with international requirements of the IMO:

1. SSAS shall comply with IMO Resolution MSC.136 (76) with amendments;
2. Identification of the ship shall be in compliance with IMO circular MSC.1/Circ.1190;
3. The message priority and control of SASS testing shall comply with IMO circular MSC/Circ. 1155.

For the frequency of SSAS testing the Estonian Transport Administration establishes the following requirement:

Estonian flag ships on which the SSAS has been installed, shall test the SSAS at least twice a year:

- once during the annual Radio Survey and;
- the second time between the fifth and sixth month after the Radio Survey.
