

Summary of the proposed amendment

Estonia proposes a Thematic Facility amendment of the Internal Security Fund (ISF) programme for the inclusion of the specific action project “SIENA-roll-out support” selected by the Commission (Ref. Ares(2026)2107944) and related adjustments.

The target values of the relevant indicators are increased in line with the expected outputs and results of the specific action.

Non-substantial changes are made for transferring allocations between types of actions within the same Specific Objective. All proposed amendments are in line with the enabling conditions and horizontal principles referred to in Regulation (EU) 2021/1060.

The proposed amendment has been approved by the Monitoring Committee on 15.05.2026 (Protocol No 14-13.2/204-1; signed on 21.05.2026)

For inclusion of the specific action project “SIENA-roll-out support”, adjustments have been made in the narrative part of the programme (SO1) as well as in the financing, indicators and technical assistance tables.

In addition, distribution of funds between the types of intervention within SO1 has been changed to allow to purchase more equipment under the Prüm II project for the Police and Border Guard. Under SO2 funds have been reallocated between types of intervention within the same SO to allow the Tax and Customs Board to purchase additional equipment in the frame of the Specific Action EMPACT project. The allocation for equipment in the whole programme is still well under the 35% ceiling.

Also, the target value of the result indicator “Number of Schengen evaluation recommendations addressed” has been changed as it refers to percentage points.

In the table of total financial allocations, operating support under SO1 has been decreased by 62 000 eur to allow more funds for regular actions.
