REACH and Chrome VI Declaration

With regard to the Regulation on the Registration, Authorisation and Restriction of Chemicals (EC1907 / 2006), we hereby confirm that all leather products (small animal skins and cowhides) are fully compliant. We ensure REACH compliance by obtaining explanations from each of its chemical suppliers and conducting due diligence on parameters relevant to the leather industry.

We do not use chemicals listed on the authorisation list (Annex XIV) and ensure that our processes comply with the limitations of Annex XVII and we confirm that the leather articles manufactured by Mahmood Brothers Tannery do not contain SVHC shares above 0.1 % by weight.

Regarding the Chrome VI content requirements of Commission Regulation (EU) No 301/2014, which refers to a limit value of chromium VI of less than 3 mg/kg for leather articles worn on the skin. If they are tested in accordance with EN ISO 17075-1, we confirm that the leather supplied by us meets this requirement.

Abrar Ahmed
Managing Director
Mahmood Brothers Tannery
