Jūs bieži saņemat e-pastu no adreses j.udrass@lvm.lv. [Uzziniet, kāpēc tas ir svarīgi](#)

Hello RMK team!

My name is Janis Udrass – Latvia state forest head of production and infrastructure department. I have been nominated for the position just few weeks ago, and one of many tasks to accomplish is to create a review of viewing towers in Baltics and Scandinavia. The task is to present to members of board different types of building materials and innovations used in tower construction, project, building costs (Europe's funding).

We have a plan to build two new towers in 2026 and 2027 and the goal for all of this work is to get concept of viewing tower building materials, sustainability and lowering maintenance costs.

I would be very grateful if you could send information about viewing towers built in last ten years – tower designing costs, building costs and Europe's co-financing if there has been one! Pictures I can find on the internet, but if you have some, it would be nice if you could share some!

Thank you in advance from me and team Latvia state forest!

PS. I will understand if the required information is classified.

Kind regards,

**JĀNIS UDRASS**

Woodworking factory manager/ Head of Production and infrastructure department
