

Diagram of KV1 protein structure. A red line highlights a specific region of the protein, likely the voltage-sensing domain, which is shown in a blue-shaded area. The protein is represented by a blue line with a red dot indicating a specific site.

A diagram showing a horizontal red bar labeled 'V2'. Several lines intersect this bar: a blue line from the left, a green line from the bottom-left, a cyan line from the bottom-left, a black line from the bottom-left, and a blue line from the top-right. The lines are colored to match the text in the adjacent column.
