**Reminder: Request for information – CASP
2024 testing campaign on Disposable
electronic cigarettes under a European
Commission product safety project**

Dear EY Project Team, We are Laboratory of Chemical Analysis of Estonian Health Board. Our laboratory is indeed accredited for ISO/EN 17025 and among other analyses is also conducting consumer product analyses.

Unfortunately, I should mention, that at the moment it is not possible to conduct required analyses in our laboratory, even in non-accredited way. If you have any further questions, do not hesitate to ask.

	Topic	Question	Laboratory answer
1	Interest	Is your laboratory interested in participating in the CASP 2024 testing campaign?	Probably no, because none of the required test-methods is used in our laboratory.
2	Eligibility	Is your laboratory accredited to ISO/IEC 17025:2017 and to at least one of the above standards, directives or Regulations?	Our laboratory is accredited to ISO/IEC 17025:2017.
3	Scope of accreditation	Can you please confirm for which of the standards, directives or Regulations mentioned above your laboratory is accredited with a valid accreditation certificate?	None of the above mentioned
4	N° of specimens needed for each sample and test	Could you estimate the number of specimens needed for the same sample to run the various tests? Please be as specific as possible.	Generally we need 2 specimens of the same sample to run analysis.
5	Initial price estimation	Can you provide a price estimation to test products (per part of the standard)?	-

		If you foresee a discount based on volume, please indicate this as well.	
6	Capacity to host lab meeting	<p>We plan to hold a 2-day meeting in the selected laboratory in the period (tentatively) October 2024-January 2025 with 15-20 project participants. The aim of the meeting will be to visit the facility and discuss testing results with laboratory representatives.</p> <p>Is your laboratory able to host such a meeting?</p>	Our laboratory is theoretically able to host such a meeting.
7	Contact person	Could you provide us the contact details of the person within your organisation dealing with testing/business development?	<p>Quality specialist – Jelena Pipper, jelena.pipper@terviseamet.ee</p> <p>Head of laboratory – Ilona Honga, ilona.honga@terviseamet.ee</p> <p>Leading specialist – Konstantin Kislitsõn, konstantin.kislitson@terviseamet.ee</p>
8	Additional recommended testing	Is there any additional testing you would recommend to perform for the respective product group?	No

Kind regards,

Konstantin Kislitsõn 58439342
