**Subject:** RE: RIT Klass 1 changes

Hi Lennart,

Below our response regarding product change for RIT Klass1 position:

We would like to reassure you that the HP EliteBook 630 G11 offered as a replacement is indeed part of the same business-class product family, designed to meet the high standards required by professionals and organizations, just like the HP EliteBook 835 G10. Below, we outline why the replacement with the HP EliteBook 630 G11 provides comparable, and in some cases, superior performance while maintaining the same class of business functionality:

1. HP EliteBook 630 G11 meets all technical RIT requirements.
2. HP EliteBook 600 G11 series upgraded year on year and have same technology than 800 series G10.
3. HP EliteBook 600 G11 have bigger battery than HP EliteBook 835 G10 (which gives a bit bigger weigh but longer battery time)
4. Latest Generation Intel® Core Ultra Processors, which provide better performance, efficiency, and improved processing speeds compared to the previous AMD Ryzen processors in the EliteBook 835 G10.
5. HP's Business Security Suite, including HP Sure Start and HP Sure Sense, HP Sure Recovery ensuring that the EliteBook 630 G11 maintains the same high level of data protection as the 835 G10
6. Comparable Build Quality and Business-Class Standards. Both models are built with similar attention to durability and mobility. This ensures that users experience the same high-

quality workmanship and feel that they expect from an EliteBook laptop.

The proposed replacement of the HP EliteBook 835 G10 with the HP EliteBook 630 G11 is a carefully considered decision to ensure that the buyer receives a laptop of the same business-class standard. With the introduction of newer hardware, enhanced processing capabilities, and security features, the HP EliteBook 630 G11 delivers the same level of performance, security, and reliability expected from an EliteBook device. The slight differences in form factor or battery life are offset by the technological advancements and improved value offered by the 630 G11.

We are confident that this replacement does not result in any detriment to the buyer and ensures continuity in product quality and performance. Should you require any further technical comparisons or details, please feel free to reach out, and we will be happy to provide additional information.

Thank you for your understanding and continued cooperation.

p.s. HP EliteBook 835 G11 products do not meet HP proposed model with 1000Nit screen brightness. We are configuring 835 G11 only with latest generation SureView screen that has 800Nits brightness.

Best regards,
