Dear National CTIF Committees

The CTIF Executive Committee discussed at a recent meeting the situation in Tunnel Fires Working Group, which has been facing challenges due to low attendance and limited activity among its members. We would like to improve the important work of this Working Group in the future, particularly in preparation for the planned in-person meeting scheduled for November 2025.

We would therefore like to encourage all National Committees to either nominate new members for this Working Group or update the information on current members.

If you have a candidate who would be interested in working in this Working Group please send us their name and contact information by email to: contact@ctif.org by **4 June 2025**.

Best regards.
