Teema: Strategic Partnership Opportunity - EU Horizon Hospital Infrastructure Project

TÄHELEPANU! Tegemist on väljastpoolt asutust saabunud kirjaga. Tundmatu saatja korral palume linke ja faile mitte avada!

Dear Estonian Rescue Services Agency,

I am writing from WHO Regional Office for Europe regarding a strategic partnership opportunity that could significantly enhance Estonia's leadership in European healthcare emergency management. We are developing the Hospital Infrastructure Strengthening Network (HISN), an EU Horizon initiative creating Europe's first comprehensive hospital protection ecosystem. This 48-month project (2026-2030) combines systematic frameworks with revolutionary technology platforms to protect healthcare infrastructure against all modern threats.

With the support of our WHO Country Office Representative, copied here [@KÖHLER, Kristina](#), Estonia has been selected to lead the Cross-Sectoral Coordination pillars, leveraging your country's proven multi-agency coordination excellence. The Estonian Health Board has agreed to serve as the lead partner, coordinating with key agencies including the Estonian Rescue Services Agency.

The Estonian Rescue Services Agency would contribute essential expertise in:

- Hospital transportation and inter-hospital coordination during emergencies
- Emergency response protocols and evacuation procedures
- Integration with civilian healthcare emergency management
- Training development for emergency coordination

As a partner, you will benefit from direct EU funding as a project beneficiary in addition to the enhanced international recognition of your emergency management expertise

We would be honored to present this opportunity in detail through a virtual meeting. Could you kindly provide a representative's contact for a meeting as soon as possible, as the submission deadline of the proposal is November 12, 2025.

Thank you for considering this strategic opportunity to advance European healthcare security.

Respectfully,

Mafaten Chaouali
Technical Officer, Hospitals
WHO Regional Office for Europe
Copenhagen, Denmark
