Estonia

Dear Ms Sõber,

**From Data to Decisions: WHO Training on Prompt Engineering,
Data Visualization, and Knowledge Translation
7 – 10 December 2026, Brussels, Belgium**

We are pleased to inform you that the WHO Regional Office for Europe is organising “From Data to Decisions: WHO Training on Prompt Engineering, Data Visualization, and Knowledge Translation” for EU Member States, on prompt engineering, data visualization and knowledge translation, which will take place from 7–10 December 2026 in Brussels, Belgium.

This training is made possible through the generous support of the EU and the project '*Supporting the WHO European Region in Strengthening Health Information Systems and Boosting Health Data Governance*', whose objectives include building capacity across the WHO European Region.

Aligned with the Second European Programme of Work 2026-2030's vision that data, digital technologies and artificial intelligence (AI) deliver better care and stronger health systems for all, the training aims to strengthen participants' skills in AI prompt engineering, to enable the safe, effective and ethical use of large language models (LLMs) within health systems, and in data visualization and dashboard development to increase the uptake of health data for policymaking. The training also introduces a knowledge translation component to support participants in communicating their data products clearly to decision-makers.

Participants' profile and funding

Participation in the training is free of charge. Travel and accommodation costs for the participants will be covered by WHO. For this training, we are looking for health information analysts and/or policymakers involved in the routine collection, analysis and interpretation of data and health information to enable evidence-informed decision making. This can be, for example, experts who work in (sub-)national public health institutes or (sub-)national statistical offices. Policymakers are defined as people who work either at a national or sub-national health authority and are involved in policy development, implementation and evaluation. Please note that the working language during the training will be English.

Nominations

We are pleased to inform you that each Member State may send up to 1 participant for this training. If you would like to nominate an additional participant at your own expense, please inform us and we will accommodate them if space at the venue allows. At your discretion, and if this training would be relevant for them, we suggest you consider nominating the current WHO Health Information Network (HIN) representative from your country as part of the delegation:

Mr Roman Kostrõkin, Head of the Health Information System Services Division, TEHIK

We would be obliged if you could send the names, functional titles, affiliations, and email addresses of the suggested participants to the training coordinator Tyrone Reden Sy at eudigitalhealth@who.int by **10th of November** at the latest.

After we have received this information, the WHO Secretariat will follow up with the participants directly for travel arrangements and to provide more information about the training.

Should you require further information, please do not hesitate to contact eudigitalhealth@who.int.

We would like to take this opportunity to thank you for your continued fruitful collaboration with the WHO Regional Office for Europe, and we look forward to welcoming the candidates to training.

Sincerely yours,

Dr David Novillo Ortiz
Regional Adviser
Data, Artificial Intelligence and Digital Health (DAD)
Division of Health Systems (DHS)
WHO Regional Office for Europe
