# EU2025DK

COPENHAGEN LIFE SCIENCE SUMMIT

October 8-9 2025 | Copenhagen, Denmark

Join us for *Copenhagen Life Science Summit*, a two-day high-level conference - part of Denmark's EU Presidency 2025 - hosted by Rigshospitalet and Healthcare Denmark, taking place in Copenhagen on October 8-9 2025.

The high-level conference will bring together academia, decision-makers, public health organisations, industry, and patient organisations from across EU27+, creating an international forum for the European life Science ecosystem to meet, exchange insights, and engage in discussions on the European Strategy for Life Sciences. The conference will explore the state of the current EU health and life science ecosystem, highlight the need for a strong, integrated European ecosystem, and create recommendations for the European Life Science Strategy and framework for research and innovation.

Together, we will explore how Europe can advance its position as a leading life science region – ensuring our competitiveness and contributing to more resilient, innovative health systems that benefit patients across Europe.

The two-day programme:

- On October 8, Rigshospitalet will host the conference *Invest, Innovate, Collaborate, Elevate: Strategic Perspectives for an Innovative and Competitive European Life Sciences Ecosystem* on-site at Rigshospitalet.

In the evening, Healthcare Denmark will host a standing dinner reception at Copenhagen City Hall.

- On October 9, Healthcare Denmark will host the conference *Life Science: A Catalyst for European Competitiveness* at Maersk Tower, Copenhagen University.

**Please mark your calendars now!** In July 2025, when Denmark will hold the Presidency of the Council of the European Union, official invitations and registration details will be shared.

For further information and to view the preliminary program, kindly visit the official webpage here: <http://www.copenhagendlifesciencesummit.dk/>

*Copenhagen Life Science Summit* is financially supported by the European Commission; the Danish Ministry for Industry, Business and Financial Affairs; the Danish Ministry for Higher Education and Science; and Novo Nordisk Foundation.
