Subject: Consultation activities for the "Study supporting an impact assessment for a Construction Services Act"

Dear Sir/Madam,

I would like to inform you that Intellara, in collaboration with Technopolis and Milieu, is conducting the "**Study supporting an impact assessment for a Construction Services Act**" on behalf o the European Commission's Directorate-General for Internal Market, Industry, Entrepreneurship and SMEs

The study will provide input to the Impact Assessment accompanying the upcoming Construction Services Act. The main purpose of the study is to refine the problems, objectives and policy options and to assess the qualitative and quantitative impacts of identified policy options, in line with better regulation principles. The focus is on collecting data on the current state of play for construction and installation services across the EU in the Single Market (i.e. the divergent national approaches to these services) and the barriers created for the free movement of these services cross-border.

During the study, Intellara, Technopolis and Milieu will conduct consultation activities to which we kindly invite you to contribute. Your insights will be essential to shaping the study's findings and identifying potential policy options to ameliorate the free movement of construction and installation services in the Single Market. We would greatly appreciate your cooperation in sharing relevant information and perspectives, which will support a robust and evidence-based analysis. Please note that all information provided will be treated with the utmost confidentiality and used solely for the purposes of this study.

We greatly appreciate your time and consideration in supporting this important initiative. For any questions relating to the study and the purpose of the consultations, please feel free to contact the study team Luena Collini (luena.collini@technopolis-group.com) and Kincso Izsak (kincso.izsak@technopolis-group.com).

Thank you in advance for your collaboration,

Yours sincerely,

Mehdi Hocine
