

Dear colleagues.

The Center of Fire Statistics of CTIF (CFS-CTIF) would like to ask you to send the Center's statistical **data for 2024** (Table 1).

Center begins to prepare the report "**World Fire Statistics № 31**".

Deadline: **1 May 2026**.

You can download all the previous reports on the website of CTIF:

<https://www.ctif.org/world-fire-statistics>

For the new report, we have included a survey on the topic of "hospital fires" (Table 2).

As long as there are no concrete objections from the individual Member States, we will communicate exclusively in English. If necessary, we can use other languages as a means of communication. However, this requires a concrete agreement. We will send out a monthly reminder to better coordinate the work on the new CTIF statistics report. We want to inform you which CTIF member countries have already sent data (Table 3).

As always, questions and comments are welcome.

Kind regards

Center of Fire Statistics of CTIF

Dr. Peter Wagner

Table 1 for filling (2024)

Statistical data	Name of country: ???		Name of capital / largest city: ???	
	2024		2024	
Population (1,000 inhabitants)				
Area (sq.km.)				
Total number of <u>calls</u> a year:				
-fires.				
-rescue, technical aid.				
-medical aid.				
-false calls.				
- other calls				
- unknown				
Total number of fires:				
-structure	- residential (with chimneys)			
-structure	- all other buildings			
-vehicle				
-forests				
-grass, bushes...				
-rubbish				
-other fires				
-unknown				
Number of fire deaths:				
- structure	- residential (with chimneys)			
- structure	- all other buildings			
-vehicle				
-other				
Number of fire injuries:				
- structure	- residential (with chimneys)			
- structure	- all other buildings			
-vehicle				
-other				
Number of fires by fire cause:				
-electricity Equipment Failure				
-gas Equipment Failure				
-playing with fire				
-fireplace, stove				
-carelessness				
-smoking				
-arson				
-other <u>known</u> causes				
- <u>unknown</u> causes				
Number of fires by means of their extinguishing:				
-before arrival of fire units				
-small equipment's				
-1-jet				
-2-3 jets				
-more than 3 jets				
-foam jets				
-others				
-unknown				
Number of firefighter deaths, total				
-firefighting accidents				

-non-firefighting accidents		
Number of firefighter injuries		
-firefighting accidents		
-non-firefighting accidents		
Number of all firefighters:		
-professionals (full time, public service)		
-professionals (full time, private company)		
-part timer		
-volunteers		
Number of female firefighters:		
-professionals (full time, public service)		
-professionals (full time, private company)		
-part timer		
-volunteers		
Number of young (junior) firefighters:		
Number of fire stations		
-professionals (full time, public service)		
-professionals (full time, private company)		
-part timer		
-volunteers		
Number of mobile equipment / vehicles (total)		
-fire engines (pumpers)		
-ladders and hydraulic lifts		
-medical rescue units /ambulances		
-other fire automobile		

Table 2

Data for Special chapter “Hospitals” (national level)
please mark with “X”

Note the country name: _____ ???	Yes	No	Remark
1. Is there any information about the number of hospitals?			
2. Is there a special definition of what a hospital is?			
3. How many hospital fires were recorded in 2024?			
4. How many hospital fires were associated with the fire of the façade?			
5. Are there any national publications on the subject of hospital fires?			
6. Do the fire brigades have specially trained teams for firefighting in hospitals?			
7. Do the fire brigades use helicopters for hospital fires?			
8. Do the fire brigades use drones in hospital fires?			
9. Is it allowed to operate hospital in high-rise-buildings?			
10. Is it allowed to operate facilities for disabled people in hospital buildings?			
11. Is it allowed to operate facilities like kindergarten, schools etc. in hospital buildings?			
12. Is it allowed to operate department store and warehouses in hospital buildings?
