Report from the Commission to the European Parliament and the Council
concerning the exchange through the European Criminal Records Information System (ECRIS) of information extracted from criminal records between the Member States

{COM(2026) 284 final}

1. General principles of the ECRIS system

ECRIS is based on a decentralised architecture, interconnecting the Member States and enabling them to exchange information on criminal records in an efficient way.

- For the purposes of ECRIS, each Member State must designate a **central authority** (or several central authorities) as a single point of contact and entrust it with all responsibilities under Framework Decision 2009/315/JHA.
- Information is exchanged electronically between the central authorities of Member States, using a standardised format that allows for efficient and immediately understandable communication in all EU languages within **short deadlines of 10 or 20 working days**.
- A Member State that has convicted a national of another Member State is legally obliged to notify through ECRIS, as soon as possible, the information related to the conviction to the Member State(s) of that person's nationality, including any subsequent updates (**notifications of new convictions and of updates**).
- The Member State of nationality maintains a central repository of all convictions handed down against its nationals by criminal courts in other EU Member States, in addition to any convictions handed down in the Member State itself. It is obliged to store and update all information received through ECRIS and to provide full information on criminal records through ECRIS (**replies to requests**) when requested by another Member State (**requests for information**).
- Information on convictions must be exchanged for the **purpose of criminal proceedings** and may, if permitted by national law, be exchanged for **other purposes**, such as administrative procedures, employment, licences, etc.
- Although ECRIS is designed primarily to enable the exchange of information concerning EU nationals, it also allows for the exchange of information on **third country nationals** and stateless persons (in the following: TCN). The supplementing legislation establishing a central ECRIS-TCN system to support efficient exchanges of information on TCN through ECRIS was adopted in 2019¹, and the system will become operational in 2027.

Member States were obliged to ensure both the legal and the technical implementation of the ECRIS system, interconnect electronically with each other and start exchanges in line with the general principles described above by 27 April 2012.

3. Statistics on individual Member States

The tables below present, for each Member State and for the United Kingdom³, the number of **convictions of nationals of other Member States** (EU non-nationals) handed down on its territory **versus** the number of **notifications of new convictions sent**, the number of **notifications of updates** relating to previously notified convictions, the number of **requests for information sent** and the number of **requests received versus** the number of **replies sent, including** the number of **replies sent after the deadline**, in the period 2020 - 2024.

³ For 2020.

All Member States and the United Kingdom have provided the Commission with the **data on convictions** of nationals of other Member States handed down on their territory. The data on convictions of EU non-nationals are vital for evaluating whether all convictions have been notified to the respective Member States of nationality.

In many Member States the number of notifications of new convictions exceeds the number of convictions of nationals of other Member States. This discrepancy may be due to the Member State concerned sending a large backlog of old notifications in a given year.

The data submitted by the Netherlands includes not only convictions as defined in the Framework Decision 2009/315/JHA, but also other types of decisions in criminal proceedings registered in its criminal records.
