On behalf of the State Specialised Forest Enterprise "Forests of Ukraine" (hereinafter referred to as SFE "Forests of Ukraine"), which holds a significant role in the management and protection of Ukraine's forest resources, we are writing to propose a collaborative partnership.

Established in October 2022, SFE "Forests of Ukraine" is actively engaged in afforestation, reforestation, forest protection, and a range of other functions, including timber harvesting and sales. Our key priorities encompass forest conservation, expansion, sustainable resource utilization, and achieving profitability.

SFE "Forests of Ukraine" plays a pivotal role in the management and conservation of Ukraine's forest resources. Standing as the leading forest user in the country, our organization implements effective forestry practices to ensure the growth and protection of forest plantations.

One of our primary areas of focus is the cultivation of planting material for forest tree species with a closed root system. Our aim is to ensure the robust vitality and adaptability of plants by employing innovative growing technologies. As a result, we have the capacity to produce over 40 million units of planting material annually.

Given our capabilities and resources, we extend an invitation to explore cooperation in the field of growing and selling forest plants. We are open to discussing projects that involve the use of your seeds to create high-quality planting material.

We are dedicated to a responsible approach to forestry and firmly believe that collaborative efforts will contribute to the achievement of our shared goals.

For more information and to discuss potential cooperation opportunities, please contact the "Forest Reproductive Resources" Branch of SFE "Forests of Ukraine". You can reach out to Ruslan Hrechanyk, Director of the Branch, by phone at +380 (67) 255 28 82 or via email at [f\\_reproduct@e-forest.gov.ua](mailto:f_reproduct@e-forest.gov.ua).

We eagerly await the possibility of coop
