

Group 3: Stakeholders at the Member State Level

Background & Role

1. Can you start by introducing your institution and your role in it?
2. Can you describe your institution's and your role in implementing or overseeing the Data Governance Act at the national level? e.g., Transposing relevant aspects into national procedures, supervising compliance, providing guidance, or coordinating with EU bodies.
3. How does your institution coordinate with other national authorities and/or with EU institutions regarding the DGA?
 - If so, are there established channels for information-sharing, joint decision-making, or consultation with stakeholders? How effective are they?

Legislative Intent

4. From your institution's perspective, what are the main goals the DGA aims to achieve in the national context?
5. Looking at the first years of DGA implementation, to what extent does your institution think these goals have been met at the national level?
6. Does your institution believe that there are areas where the objectives are being met more successfully, and others where progress is slower? If so, which ones?

Implementation Insights

7. Did your member state face any difficulties or challenges in implementing the DGA? If so, which?
8. Did your member state face any specific conditions that facilitated the implementation of the DGA in your country?
 - E.g., pre-existing national laws, regulatory frameworks, technical infrastructure, or in-house expertise.

Gathering Feedback from Stakeholders

9. How has your institution gathered feedback from stakeholders during the implementation of the DGA? If so, which ones and through what means? (e.g., data intermediaries, industry, civil society, public bodies), and (e.g., consultations, workshops, surveys)?
10. Based on this feedback, are there notable differences in awareness or understanding of the DGA between these groups?
11. Did your institution use stakeholder feedback to shape implementation strategies or develop guidance materials? If so, what adjustments or improvements were made?

Future Directions

12. Based on your experience so far, are there any changes or clarifications to the DGA? If so, which ones and why?
