**First Global Survey on the Monitoring Framework of the Global Action Plan
on Promoting the Health of Refugees and Migrants**

The World Health Organization (WHO) presents its compliments to Member States and Associate Members, and has the honour to inform them that WHO has established the Monitoring Framework of the WHO Global Action Plan on Promoting the Health of Refugees and Migrants, 2019–2023, extended to 2030 (GAP). The GAP monitoring framework serves as an important tool in the broader global health landscape. A dedicated set of fit for purpose data on migrants and refugees will not only define WHO's contribution to Member States efforts to implement the GAP but also shape WHO's own impact framework.

To address resolution WHA76.14 (2023), which requests the Director-General to submit a progress report to the Health Assembly in 2025, 2027, and 2029 on the implementation of this resolution and on the GAP, Member States are invited to participate to the first Global Survey around the GAP Monitoring Framework.

The online survey (via an electronic questionnaire) will take place from 1 November to 15 December 2024 and will provide critical information around the inclusion of refugees and migrants in policies at country level. A concept note outlining the context, goal, objectives is available in the six official languages at the following link: <https://shorturl.at/dS2lv>.

Member States are invited to communicate not later than 29 October 2024, by sending an email to healthmigration@who.int, the name(s) of their focal person(s) based in the Ministry of Health in charge of the health of migrants and refugees who will be responsible for responding to the survey. An electronic questionnaire will then be shared to the designated focal person(s).

The World Health Organization takes this opportunity to renew to Member States and Associate Members the assurance of its highest consideration.

GENEVA, 15 October 2024
