**Nomination of Mr Pallas Mudist for the Capacity
Building Workshop on Cultivating Sustainable
Communities through Cultural Assets**

The Ministry of Culture of Estonia is pleased to nominate Mr Pallas Mudist, Creative Economy Adviser, to participate in the Capacity Building Workshop on Cultivating Sustainable Communities through Cultural Assets, to be held in Jeju, Republic of Korea, from 8 to 11 September 2026.

Mr Mudist works on the development of Estonia's creative economy policy, with a particular focus on connecting the cultural and creative sectors with entrepreneurship, innovation, exports and international growth. He works closely with public institutions, Enterprise Estonia and creative-sector organisations to support a more coherent development pathway for creative enterprises.

He is currently contributing to the development of Estonia's creative economy export approach, including how cultural and creative assets, design, intellectual property and other creative capabilities can support higher-value products, services and internationalisation.

The workshop is directly relevant to his professional responsibilities and would provide valuable international examples and practical insights for Estonia's ongoing policy development. We also believe that Mr Mudist would actively contribute to the exchange of experience during the programme.

The Ministry of Culture of Estonia supports his application and participation in the workshop.

Sincerely,

Merilin Piipuu
Secretary General
