

PadelSport Global Complete Domain Network

Executive catalogue edition · English

An exhaustive, grouped and visually structured presentation of the entire domain portfolio — showing how the naming system surrounds the world and maps the whole ecosystem.

1,281 DOMAINS

754 GEO

527 FUNCTIONAL

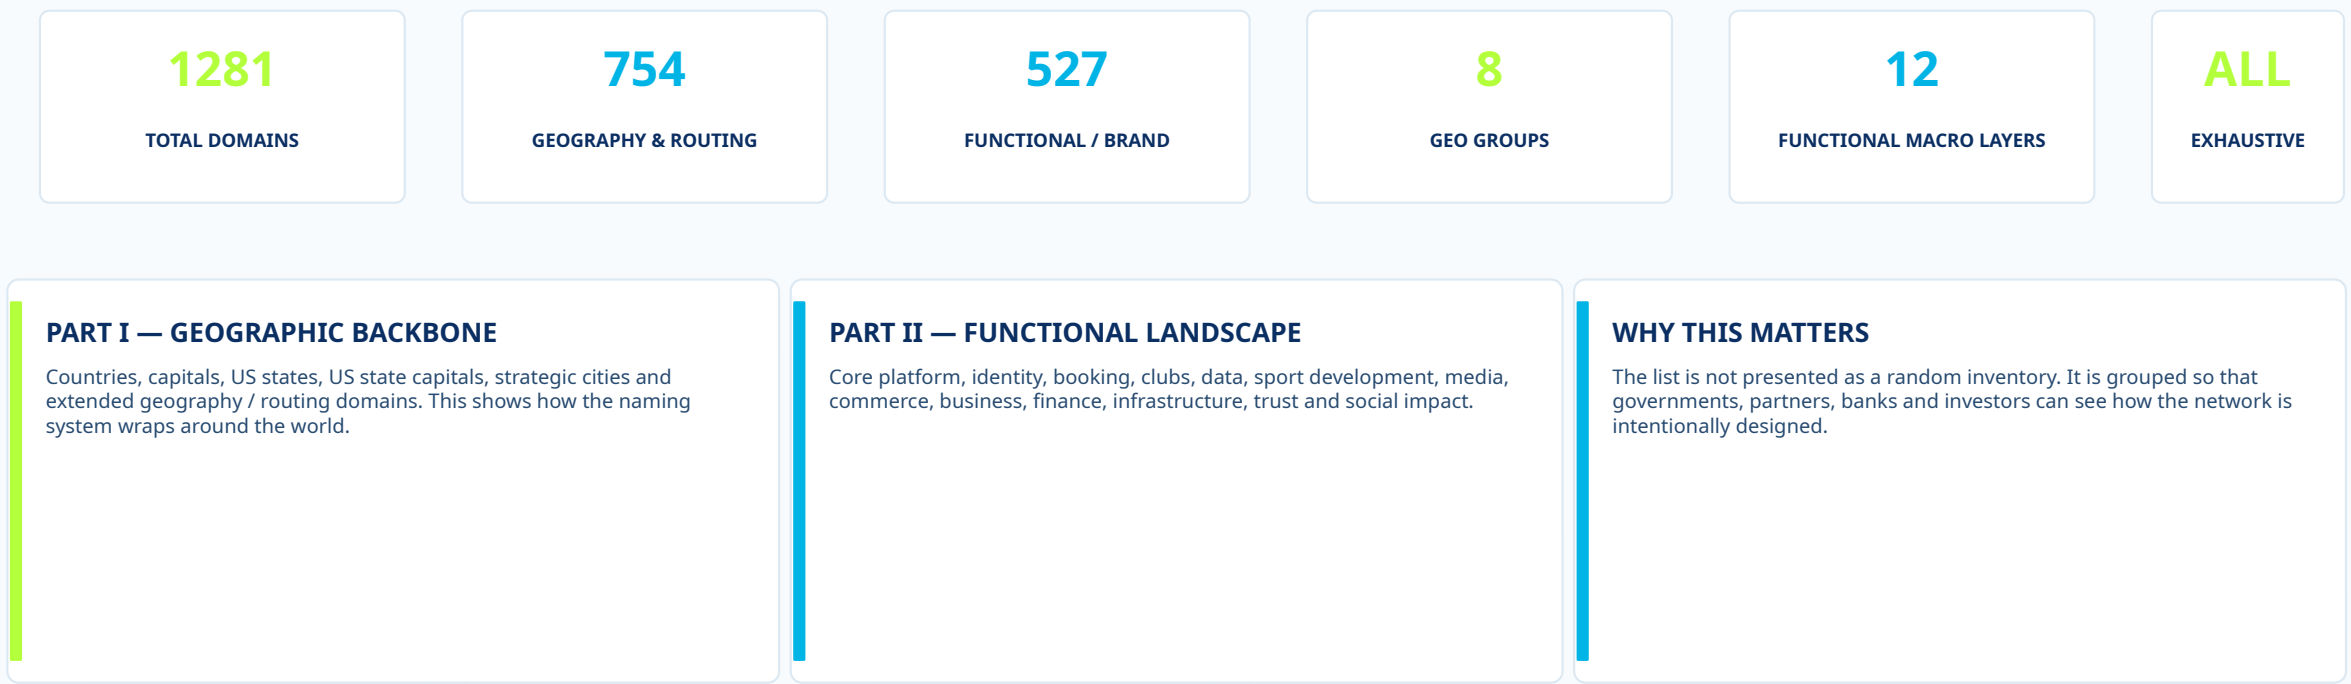

Every domain is listed in grouped form inside this document.

SPORT & SOCIETY — two equal pillars. One global ecosystem.

How to read this catalogue

The complete domain network is presented in the same strategic logic used across the ecosystem: first the global geographic shell, then the functional and sector-based operating layers.

The list itself tells a strategic story

A consistent naming system makes the ecosystem easier to understand, more memorable to external stakeholders and easier to activate over time.

CONSISTENCY

The same PadelSport naming family appears across countries, cities and functional categories. That coherence makes the portfolio feel designed rather than accidental.

GLOBAL READABILITY

An external reader can immediately understand which parts of the portfolio are geographic, which are service layers, and which support the social or institutional mission.

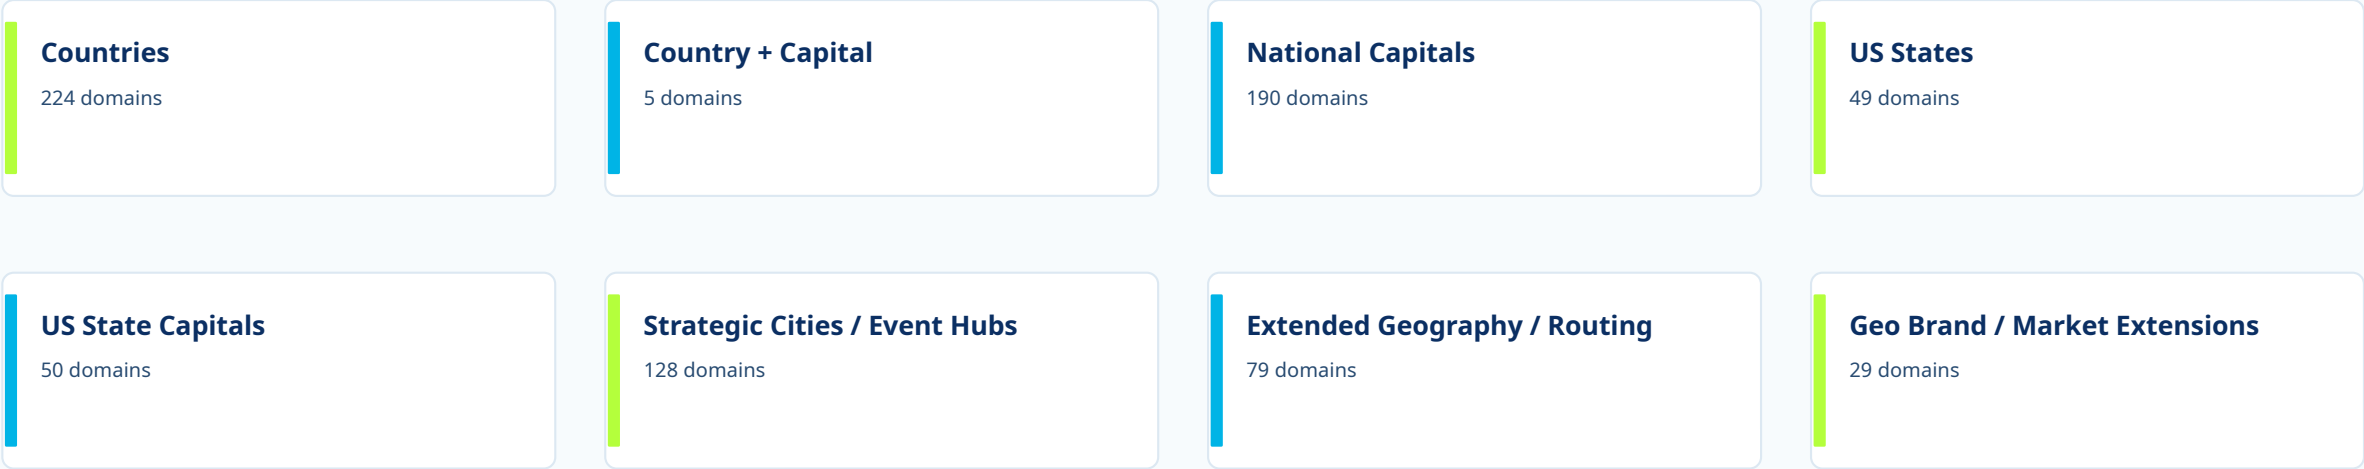

ACTIVATION POTENTIAL

Not every name must be activated at once. But the grouped structure helps define what can later become a country hub, a city node, a booking service or a business platform.

The following pages list every domain name in grouped form.

How the network surrounds the world

The geographic shell is the outer map of the ecosystem — country by country, capital by capital, state by state and city by city.

All geographic groups are listed in full on the following pages.

Country — 224 domains (1/4)

Sovereign-country domains and country-level market nodes.

Column 2

Column 3

The network is now visible as a whole

This catalogue is intended to make the scale and structure of the portfolio tangible. When every name is grouped and shown visually, the network can be understood not merely as a collection of purchases, but as the naming architecture of a global ecosystem.

WHAT THIS DOCUMENT SHOWS

Every domain name, grouped into a strategic structure and presented in an institutional visual system.

WHAT IT SUPPORTS

Clarity for government, federation, investor, banking, partner and strategic dialogue.

WHAT COMES NEXT

Activation priorities, registry governance, partner mapping and execution planning can now build on a visible common map.
