The Hon. Karmen Joller  
Minister  
Ministry of Social Affairs  
Republic of Estonia

Dear Karmen,

I am pleased to inform you that the "Workshop on AI in Smart Healthcare (I)," organized by Taiwan's International Cooperation and Development Fund (ICDF), is scheduled to be held from June 4 to 13 of this year, and is now open for applications.

Due to the global trend of aging populations and increasing healthcare demands, countries are responding to the World Health Organization (WHO) by accelerating the development of digital health technologies to address issues related to the shortage of medical resources and healthcare personnel. Artificial Intelligence and Robotics is playing an increasingly critical role in effective and safe delivery of healthcare solutions across demographics.

This workshop will leverage Taiwan's technological industry advantages to share with partner countries in establishing the concept of implementing healthcare information systems. Furthermore, it will integrate technologies such as artificial intelligence and big data analytics to provide comprehensive and innovative healthcare solutions for our allies and friendly nations. We hope to collaboratively execute a "Health Co-Creation Model" based on the needs of partner countries in the future.

ICDS will be responsible for providing attendees with a round-trip economy class air ticket, cover course fees, meals and accommodation. The eligibility for participants to register includes mid- to senior-level officials responsible for promoting policies related to smart healthcare and health promotion, as well as officials from public health and disease control
