

Dear colleagues,

As a follow up to the 2025 WHO report on Nature-based solutions and Health, the next report on nature-based solutions (NbS) and Health due May 2027 will look at practical examples of NbS implementation and their potential to benefit health. For this WHO is calling for already implemented NbS examples and related experiences from all 53 WHO Member States of the WHO European Region – covering all spatial scales and all types of settings, and also including application of NbS in health care settings or other institutionalized settings (such as, daycare, school, workplace, nursing home).

The NbS case study examples should

be fully implemented by 2025 to allow for an assessment of impacts, and have an impact on health and wellbeing, either by affecting health risks and determinants, promoting healthy lifestyles, or enhancing health and wellbeing directly (even if health and wellbeing are not primary objectives of the NbS).

Please note that submitted case study examples will be reviewed by WHO through its Collaborating Centre for Natural Environments and Health at the University of Exeter, and selected submissions will be revisited in more detail. Some of the case studies may be featured in the forthcoming report on NbS and Health in 2027.

This online submission form should take around 15-20 minutes to fill.

Please note that only case studies originating from Member States of the WHO European Region will be eligible for the report (see list of countries at <https://www.who.int/europe/home?v=welcome#> under “Countries”).

Please share the link for this call for case studies with NbS experts and persons involved in respective projects on nature-based solutions in your ministry, institution or organisation. Also, feel free to forward the call through your networks.

Submissions will be collected until 30 April 2026.

For further questions on this call for case studies, please write to Rebecca Lovell at the WHO Collaborating Centre team at R.Lovell@exeter.ac.uk

Section A: Context

A1.

Please describe the nature-based intervention and what was done (up to 30 words).

A2.

In what year was the intervention implemented?

If the implementation was done over more than one year, please provide the year when the project was finalized.

- before 2000
- 2000
- 2001
- 2002
- 2003
- 2004
- 2005
- 2006
- 2007
- 2008
- 2009
- 2010
- 2011
- 2012
- 2013
- 2014
- 2015
- 2016

- 2017
- 2018
- 2019
- 2020
- 2021
- 2022
- 2023
- 2024
- 2025

A3. In which country was the intervention implemented?
(NB - only Member States of the WHO European Region are eligible)

- Albania
- Andorra
- Armenia
- Austria
- Azerbaijan
- Belarus
- Belgium
- Bosnia and Herzegovina
- Bulgaria
- Croatia
- Cyprus
- Czechia
- Denmark
- Estonia
- Finland
- France
- Georgia
- Germany
- Greece

- Hungary
- Iceland
- Ireland
- Israel
- Italy
- Kazakhstan
- Kyrgyzstan
- Latvia
- Lithuania
- Luxembourg
- Malta
- Monaco
- Montenegro
- Netherlands (Kingdom of the)
- North Macedonia
- Norway
- Poland
- Portugal
- Republic of Moldova
- Romania
- Russian Federation
- San Marino
- Serbia
- Slovakia
- Slovenia
- Spain
- Sweden
- Switzerland
- Tajikistan

- Türkiye
- Turkmenistan
- Ukraine
- United Kingdom
- Uzbekistan

A4. In which city / cities or which region(s) was the intervention implemented (up to 15 words)?

A5. In which setting was the intervention implemented? Please choose one option only.

Public space

Health care facility

Institutional setting (day care, school, nursing home etc.)

Private space (company grounds etc.)

Other (please indicate)

Other (please indicate)

A6. Please describe, in a few words, the setting or place in which the intervention was implemented (up to 15 words).

A7. Please list the lead agency for the intervention, and the key partners (up to 30 words).

Section B: Objectives and impacts

B1. What was the main objective for implementing the nature-based solution intervention (up to 30 words)?

B2.

What were the expected impacts or outcomes of the intervention (up to 30 words)?

B3.

What were the outcomes and results of the intervention? Were the expectations fulfilled (up to 60 words)?

B4. Does the implemented nature-based solution:

Yes Uncertain No

specifically address or consider human health challenges?

integrate across sectors (such as environment, health, economics, planning, transport etc.)?

consider ecosystem renewal/biodiversity restoration/nature recovery?

consider economic benefits?

include equitable governance and community participation?

balance trade-offs and mitigate risks?

involve adaptative management following ongoing evaluation of impacts?

consider sustainability and long-term viability?

B5.

Please indicate how the implemented nature-based solution relates to health and wellbeing (up to 50 words).

B6.

Please provide one or two key messages learnt from the project (up to 50 words).

Section C: Resources

C1. If available, please provide the URL to a webpage containing information on the project/intervention.
