## Betreff: KODIAK – De-escalation

Dear Sir or Madam,

two years ago I asked for your support in our research project AMBOSafe “Attacks on employees and staff of organizations with security tasks” ([www.ambosafe.de](http://www.ambosafe.de)). We recorded training in the field of de-escalation all over Europe and in detail in Germany. We are very thankful for your support!

Based on our research and other worldwide published studies we worked out KODIAK, a psychological model of Communicative De-escalation in Everyday Conflict Situations (German: Modell kommunikativer Deeskalation in alltäglichen Konfliktsituationen [=KODIAK]).

KODIAK aims to assist police officers in developing skills to manage conflicts in everyday operations. It provides targeted guidance on how to de-escalate effectively in these deployment scenarios.

We have attached a special edition of the Journal where we published KODIAK. Please pass it on to whom it may concern. On our website [www.kodiak-revier.de](http://www.kodiak-revier.de) we present further information and material for teaching and learning.

We are, of course, at your disposal for any questions!

If you are not the right contact person for this topic, we would be very grateful if you could send this letter and the attached special edition to the competent authority in your country.

Kind regards,

Prof. Dr. Clemens Lorei
