# International survey on Antimicrobial Stewardship Programs in Primary Care &

Background of the survey

The survey is conducted under the European Joint Action on Antimicrobial Resistance and Healthcare-Associated Infections 2 (EU-JAMRAI-2), specifically in Work Package 6 (WP6). This WP focuses on Antimicrobial Stewardship (AMS) in humans, animals, and the environment. With the overall objective to make Europe a best practice region and to support the development and implementation of core elements and core competencies on AMS, task 6.1 addresses AMS in human health. One of the main goals of this activity is to provide a common European framework on AMS in the human field. This is a set of three surveys on the Antimicrobial Stewardship Programmes (ASP). Each of them will focus on a level of care: hospital, primary care and long-term care facilities.

#### This survey refers to Primary Care

According to the World Health Organization (2008). Primary Health Care: Now More Than Ever. Geneva: World Health Organization: "Primary health care is essential health care that is universally accessible to individuals and families in the community, provided by health professionals who are accountable for addressing a large majority of personal health care needs, developing a sustained partnership with patients, and practicing in the context of family and community."

For this survey, the following definition will serve for clarification: Primary care refers to health care provided by a medical professional (such as a general practitioner, pediatrician, or nurse) with whom a patient has initial contact and by whom the patient may be referred to a specialist.

It is important to note that, for this survey, the term "Primary Care" excludes long-term care facilities, such as nursing homes, even if these are integrated with or closely linked to primary care services in some contexts.

Additionally, through the survey, the term "Primary Care Reference Area/Organizational Unit" will be used. This should be understood as the geographical areas or regions where primary care services are organized and delivered. These areas include healthcare centres or facilities responsible for providing primary care to the designated population or citizens. The structure ensures that primary care services are accessible within the community and aligned with local healthcare needs

\* Obligatoria

Aim of the survey: To identify the core elements and core competencies for primary care AMS across Europe.

Target sources of information to complete the survey: National Action Plans (NAP) on Antimicrobial Resistance (AMR), equivalent National Strategies, Programmes, or other institutional documents not developed under AMR NAPs or strategies. These are guidance frameworks developed by governments' official institutions or health authorities to address the challenges of AMR. NAPs are an essential element in the fight against AMR and should encompass key elements promoting the optimal use of antimicrobials by encouraging the development and implementation of Antimicrobial Stewardship Programmes (ASPs) in the human healthcare field. The results of this survey will be used to identify common and differing elements as an initial step for developing a common framework for Primary Care ASP in European countries. Subsequently, the global relevance and feasibility will be evaluated, followed by a structured consensus procedure to select common core elements and competencies for Primary Care.

**Practical instructions**: Please complete this survey by **Monday 9th December**. Your responses will help us prepare for the WP6 T6.1 Antimicrobial Stewardship in humans Workshop focused on Primary Care.

Note that for clarification purposes you will find a glossary at the beginning of the page and explanatory notes (\*) under certain questions.

Please refer any questions related to this survey to: <a href="mailto:aemps.jamrai@aemps.es">aemps.jamrai@aemps.es</a>

### **INSTITUTION CONTACT INFORMATION**

1.	Full Name *				
2.	Country *				
3.	Contact details (email address) *				
	Escriba una dirección de correo electrónico				
4.	Academic qualification *				
5.	Current role *				
6.	Name of the Institution represented *				
7.	Name of institution/health authority that coordinates the NAP *				
8.	If you don't work in the institution/health authority that coordinates the NAP, indicate your position in relation with the coordination of the NAP *

AMR: Antimicrobial resistance AMS: Antimicrobial stewardship

# General information regarding your National Action Plan on AMR (AMR-NAP).

ASP: Antimicrobial Stewardship Programmes HCP: Healthcare professionals NAP: National Action Plan 9. Does your country have a NAP or equivalent National Strategies or Programmes with specific information regarding Primary Care core AMS elements? \* Yes No I don't know/unclear in documentation 10. If your NAP guidance document or equivalent National Strategy or Programme is publicly available, please provide an URL \* If your NAP guidance document or equivalent National Strategy or Programme is not publicly available, please provide the latest version of the official documents (PDF version or other...) to <a href="mailto:aemps.jamrai@aemps.es">aemps.jamrai@aemps.es</a> 11. Does your NAP or equivalent National Strategies or Programmes include provisions to encourage financial support for Primary Care ASP activities (e.g., funding for salaries, training, etc.)? \* Yes No I don't know/unclear in documentation 12. Does your NAP, government official institution or health authority develop a set of professional competencies for healthcare professionals (HCP) (\*) on Primary Care ASP? (\*) By professional group (pharmacists, microbiologists, primary care physicians, paediatricians, epidemiologists, etc), and/or speciality (surgery, preventive, etc) Yes No I don't know/unclear in documentation

3.	If your NAP, government official institution or health authority has a guidance document of professional competencies for HCP on Primary Care ASP and is publicly available, please provide URL *					
	If the guidance document is not publicly available, please provide the latest version of the official documents (PDF version or other) to <a href="mailto:aemps.jamrai@aemps.es">aemps.jamrai@aemps.es</a>					
ļ.	Does your NAP or other government official institution have a set of reference indicators (*) for Primary Care ASP assessment publicly available (e. g. antimicrobial consumption, microbiological data, clinical outcomes, process indicators)? *					
	(*) A reference indicator is used to evaluate various aspects of antimicrobial use and its impact (structure, process and/or outcome indicators). These indicators help in tracking progress, identifying areas for improvement, and ensuring optimal use of antimicrobials.					
	Yes					
	○ No					
	I don't know/unclear in documentation					
	If your NAP or government official institution has developed Primary Care AMS indicators, please provide links to the latest versions *					
	If they are not publicly available, please provide the latest version of the documents (PDF version or other) to <a href="mailto:aemps.jamrai@aemps.es">aemps.jamrai@aemps.es</a>					
·.	Does your NAP or other government official institution have reference national guidelines for the management of the most common infectious diseases in the community? *					
	○ Yes					
	○ No					
	O I don't know					
,	If your NAP or government official institution has reference national guidelines for the					
•	management of the most common infectious diseases in the community and is publicly available, please provide URL *					
	If they are not publicly available, please provide the latest version of the documents (PDF version or other) to <a href="mailto:aemps.jamrai@aemps.es">aemps.jamrai@aemps.es</a>					

#### **SURVEY**

**INFORMATION REGARDING PRIMARY CARE ANTIMICROBIAL STEWARDSHIP PROGRAMMES (ASP)** in your National Action Plans on Antimicrobial Resistance or equivalent National Strategies or Programmes.

This survey is divided into 6 domains:

DOMAIN 1. GOVERNANCE OF THE ASP: PRIMARY CARE LEADERSHIP COMMITMENT

**DOMAIN 2. HUMAN AND TECHNICAL RESOURCES DOMAIN** 

DOMAIN 3. ACTIONS: INTERVENTIONS TO OPTIMISE ANTIMICROBIAL USE DOMAIN

DOMAIN 4. EDUCATION, PRACTICAL TRAINING, COMPETENCE DEVELOPMENT AND COMMUNICATION DOMAIN

DOMAIN 5. RESULT ANALYSIS AND REPORTING DOMAIN

DOMAIN 6. EVALUATION OF IMPLEMENTATION AND ACCREDITATION/ CERTIFICATION

# **DOMAIN 1. Governance of the ASP: Primary Care Leadership Commitment**

Refers to the institutional support for the ASP by the Primary Care management or institution management (local/regional level)

Glossary on this section:  AMS: Antimicrobial stewardship  ASP: Antimicrobial stewardship programmes  GP: General Practitioner  HCP: Healthcare professionals  NAP: National Action Plan				
18. Does the NAP or equivalent National Strategies or Programmes recommend that each Primary Care reference area or organizational unit have its own specific antimicrobial stewardship team? *				
(	$\subset$	Yes		
(	$\subset$	No		
(		I don't know/unclear in documentation		
19. A	t w	which level are these teams recommended to be established *		
(	$\supset$	Regional		
(	$\subset$	Provincial		
(	$\supset$	Network level (collaborative groups of healthcare providers (e.g., GPs, clinics, allied HCP) within a specific area working together to deliver coordinated care)		
(	$\subset$	Facility level (individual healthcare facilities within the primary care setting, such as a specific clinic, health centre (excluding nursing homes)		
(	$\subset$	Practice level (individual medical practices, such as a group of GPs working together within a practice or a single HCP practice setting)		
(	$\subset$	Unknown		
(	$\subset$	Otras		
P p ('	rin rog	s your NAP or equivalent National Strategies or Programmes recommend that nary Care management to formally commit to the ASP and prioritize it as a key gramme within the institution(*)? * Inderstood as the national/regional/local health service -whichever the case is at your country- in charge of any Care		

O No

I don't know/unclear in documentation

21.	арр	es your NAP or equivalent National Strategies or Programmes recommend ointing and involving a member of the Primary Care management team to ensure ASP has sufficient resources and support to accomplish its mission? *
	$\bigcirc$	Yes
	$\bigcirc$	No
	$\bigcirc$	I don't know/unclear in documentation
22.	eml	es your NAP or equivalent National Strategies or Programmes recommend pedding the ASP to an organizational multidisciplinary structure responsible for S in the Primary Care *
	$\bigcirc$	Yes
	$\bigcirc$	No
	$\bigcirc$	I don't know/unclear in documentation
23.	This	structure is a *
	$\bigcirc$	Committee focused on appropriate use of antimicrobials
	$\bigcirc$	Pharmacy committee
	$\bigcirc$	Patient safety committee
	$\bigcirc$	Care quality committee
	$\bigcirc$	Otras
24.	Card	es your NAP or equivalent National Strategies or Programmes recommend Primary e reference areas or organisational units to facilitate leadership, engagement and buntability for AMS interventions by providing AMS team members dedicated time manage the programme and conduct interventions? *
	$\bigcirc$	Yes
	$\bigcirc$	No
	$\bigcirc$	I don't know/unclear in documentation

25.	Does your NAP or equivalent National Strategies or Programmes recommend the inclusion of budgeted financial support for AMS activities in Primary Care at national level (e.g. support for salary, training, rapid diagnostic tools, clinical support systems, etc.)? *
	Yes
	○ No
	I don't know/unclear in documentation
26.	Does your NAP or equivalent National Strategies or Programmes recommend that Primary Care reference areas or organizational units should have a structured local ASP framework tailored to local context and needs? *
	○ Yes
	○ No
	I don't know/unclear in documentation

### **DOMAIN 2. HUMAN AND TECHNICAL RESOURCES**

According to WHO policy guidance on integrated antimicrobial stewardship activities. Geneva: World Health Organization; 2021. (<a href="https://www.who.int/publications/i/item/9789240025530">https://www.who.int/publications/i/item/9789240025530</a>) the ability to carry out quality AMS depends on the availability of adequate resources: trained personnel with time allocated to AMS, surveillance systems to provide data about antimicrobial consumption, microbiological data, clinical outcomes, safety issues, etc., and the integration of this information into data analysis systems.

#### Glossary on this section:

AMS: Antimicrobial stewardship

ASP: Antimicrobial stewardship programme

HCP: Healthcare professionals

NAP: National Action Plan

27. Does your NAP or equivalent National Strategies or Programmes define the core composition, roles and responsibilities of a Primary Care AMS multidisciplinary team trained and experienced in infectious diseases? *
Yes
○ No
I don't know/unclear in documentation
28. List the professional profile that constitutes the core team composition (multiple answers) *
Primary care physician with experience in infectious diseases and antimicrobial resistance
Primary care paediatrician with experience in infectious diseases and antimicrobial resistance
Primary care pharmacist with experience in infectious diseases and antimicrobial resistance
Microbiologist with experience in Primary Care
Nurse with experience in infectious diseases and antimicrobial resistance
Emergency physician with experience in infectious diseases and antimicrobial resistance
Epidemiologist with experience in infectious diseases and antimicrobial resistance
Otras
29. Does your NAP or equivalent National Strategies or Programmes recommend appointing a leader for the core Primary Care AMS team, responsible for the ASP management and AMS activities? *
Yes
○ No
I don't know/unclear in documentation

30.	*	tilly the professional profile proposed as the leader for the AMS teams (multiple answers
		Primary care physician with experience in infectious diseases and antimicrobial resistance
		Primary care paediatrician with experience in infectious diseases and antimicrobial resistance
		Primary care pharmacist with experience in infectious diseases and antimicrobial resistance
		Microbiologist with experience in Primary Care
		Nurse with experience in infectious diseases and antimicrobial resistance
		Emergency physician with experience in infectious diseases and antimicrobial resistance
		Epidemiologist with experience in infectious diseases and antimicrobial resistance
		Otras
31.	reco wee	es your NAP or equivalent National Strategies or Programmes define or commend measuring the weekly or monthly dedication (number of hours per ek or month) that Primary Care AMS team members spend on AMS-specific vities? *
	$\bigcirc$	Yes
	$\bigcirc$	No
	$\bigcirc$	I don't know/unclear in documentation
32.	Indi	cate the dedication of which AMS team members are measured (multiple answers) *
		Primary care physician with experience in infectious diseases and antimicrobial resistance
		Primary care paediatrician with experience in infectious diseases and antimicrobial resistance
		Primary care pharmacist with experience in infectious diseases and antimicrobial resistance
		Primary care pharmacist with experience in infectious diseases and antimicrobial resistance  Microbiologist with experience in primary care
		Microbiologist with experience in primary care
		Microbiologist with experience in primary care  Nurse with experience in infectious diseases and antimicrobial resistance

33.	Prin AM	es your NAP or equivalent National Strategies or Programmes recommend nary Care reference areas or organizational unit regularly updated guidance for S based on/according to new evidence and local susceptibility for specific dromes?
	$\bigcirc$	Yes
	$\bigcirc$	No
	$\bigcirc$	I don't know/unclear in documentation
34.	Whi	ch of these apply *
	$\bigcirc$	There is a national reference guidance that can be adapted or adopted by Primary Care Areas/Centres
	$\bigcirc$	There is not national reference guidance. NAP recommends Primary Care Areas to develop a local guideline.
35.	Care defi	es your NAP or equivalent National Strategies or Programmes recommend Primary e reference areas or organizational units to establish standardized procedures for ning the inclusion/exclusion of antimicrobials in the antimicrobial formularies (e.g. t of antimicrobials available in the Primary Care Centres and emergency rooms)? *
	$\bigcirc$	Yes
	$\bigcirc$	No
	$\bigcirc$	I don't know/unclear in documentation
36.	Care	es your NAP or equivalent National Strategies or Programmes recommend Primary e HCP to have timely access to diagnostic results to support the management of the st common infections in the community? *
	$\bigcirc$	Yes
	$\bigcirc$	No
	$\bigcirc$	I don't know/unclear in documentation
37.	Time	ely access available for (multiple answers) *
		Imaging services
		Microbiological results
		Biochemistry and Clinical Analysis Lab results
		Rapid Diagnostic Tests for Infectious Diseases
		Otras

38.	Does your NAP or equivalent National Strategies or Programmes recommend that reference microbiology laboratories provide Primary Care HCP and management antimicrobial susceptibility data for a range of key bacteria that cause infections in the community (local sensibility maps) $^{\star}$
	Yes
	○ No
	I don't know/unclear in documentation
39.	Does your NAP or equivalent National Strategies or Programmes recommend that institutions provide tools to routinely monitor the quantity of antimicrobial prescribing in the community? *
	Yes
	○ No
	I don't know/unclear in documentation
40.	Does your NAP or equivalent National Strategies or Programmes recommend that institutions provide tools to routinely monitor the quality of antimicrobial prescribing in the community? *
	Yes
	○ No
	I don't know/unclear in documentation
41.	Does your NAP or equivalent National Strategies or Programmes recommend that institutions provide e-prescribing tools to facilitate delayed prescription of antibiotics by Primary Care prescribers? *
	Yes
	○ No
	I don't know/unclear in documentation
42.	Does your NAP or equivalent National Strategies or Programmes recommend Primary Care reference areas or organizational units have electronic medical records to document patient clinical data, indications for antimicrobial prescriptions, and description of prescribed antimicrobial treatments (e.g., dose, duration)? *
	Yes
	○ No
	I don't know/unclear in documentation

43.	43. It includes (multiple answers) *			
	$\bigcirc$	Sociodemographic data		
	$\bigcirc$	Clinical conditions		
	$\bigcirc$	Medication prescriptions (indication, name of the drug, dosage, duration, route and interval of administration)		
	$\bigcirc$	Vaccination data		
	$\bigcirc$	Hospital care visits, admissions		
	$\bigcirc$	Microbiological data		
	$\bigcirc$	Biochemistry and Clinical Analysis Lab		
	$\bigcirc$	Otras		
44. Does your NAP or equivalent National Strategies or Programmes recommend Primary  Care HCP to have timely access to the clinical information of patients? *				
	$\bigcirc$	Yes		
	$\bigcirc$			
	<ul><li></li></ul>	Yes		
		Yes No		
45.	O O Plea	Yes No		
45.	O Plea	Yes  No  I don't know/unclear in documentation

	Doeesta	Plementation of ASP interventions in nursing homes carried out by Primary Care Pyes  No  I don't know/unclear in documentation  Per your NAP or equivalent National Strategies or Programmes recommend abblishing a specific coordination strategy in AMS between the Primary Care erence area and community pharmacies to improve the management of
	Doeesta	No I don't know/unclear in documentation  Per your NAP or equivalent National Strategies or Programmes recommend ablishing a specific coordination strategy in AMS between the Primary Care erence area and community pharmacies to improve the management of actious diseases in the community? *

## DOMAIN 4. EDUCATION, PRACTICAL TRAINING, COMPETENCE DEVELOPMENT AND COMMUNICATION

According to Antimicrobial stewardship programmes in health-care facilities in low- and middle-income countries. A practical toolkit. Geneva: World Health Organization; 2019 (https://www.who.int/publications/i/item/9789241515481) educational programmes play a crucial role in providing and updating knowledge, particularly in the context of ASP. These programmes require careful planning and development of training activities. Additionally, they should be integrated into daily practice.

HCP involved in AMS activities should acquire specific competencies. ASP should facilitate access and support for training on optimized antibiotic use. This could include basic and continuous education of clinical staff, clinical case discussions, classes and regular sharing of information, reminders and AMS e-learning resources.

Resources need to be allocated to support educational workshops and training programmes on AMS with educational material and a compilation of e-learning AMS resources.

#### Glossary on this section:

AMS: Antimicrobial stewardship AMR: Antimicrobial resistance ASP: Antimicrobial stewardship programmes HCP: Healthcare professionals NAP: National Aaction Plan

58.	esta	es your NAP, governments' official institutions or health authorities recommend ablishing a competency framework that outlines the necessary skills and lifications for Primary Care AMS team members? *
	$\bigcirc$	Yes
	$\bigcirc$	No
	$\bigcirc$	I don't know/unclear in documentation
59.	-	es, which members of the Primary Care AMS team have a defined national competency nework? *
	$\bigcirc$	Primary care physician with expertise in infectious diseases and antimicrobial resistance
	$\bigcirc$	Primary care paediatrician with expertise in infectious diseases and antimicrobial resistance
	$\bigcirc$	Primary care pharmacist with expertise in infectious diseases and antimicrobial resistance
	$\bigcirc$	Microbiologist with expertise in infectious diseases and antimicrobial resistance
	$\bigcirc$	Nurse with expertise in infectious diseases and antimicrobial resistance

	$\bigcirc$	No
	$\bigcirc$	I don't know/unclear in documentation

#### **DOMAIN 5. RESULT ANALYSIS AND REPORTING**

Glossary on this section:

ASP: Antimicrobial stewardship programmes

A comprehensive analysis of the results of the ASP is needed to identify areas for improvement, target populations, and trends. This will help in planning for future actions. Sharing reports on both the AMS activities, interventions and the results obtained from this practice with professionals and managers has been shown to be an effective tool for improvement.

NA	∖P: Na	tional Action Plan	
67.	. Does your NAP or equivalent National Strategies or Programmes have a set of reference national key indicators to monitor the results of the Primary Care ASP? *

## DOMAIN 6. EVALUATION OF IMPLEMENTATION AND ACCREDITATION/CERTIFICATION

Glossary on this section:

AMS is an integral component of health systems and assessing the implementation of ASP is crucial for ensuring quality care.

# AMS: Antimicrobial stewardship ASP: Antimicrobial stewardship programmes NAP: National Action Plan 79. Does your NAP or equivalent National Strategies or Programmes define which quality standards are considered minimum for a good Primary Care ASP? \* ( ) Yes O No I don't know/unclear in documentation 80. Does your NAP or equivalent National Strategies or Programmes recommend a specific guidance on ASP implementation process in Primary Care? ( ) Yes I don't know/unclear in documentation 81. Does your NAP or equivalent National Strategies or Programmes recommend an assessment procedure for this implementation? \* ( ) Yes O No I don't know/unclear in documentation 82. Does your NAP or equivalent National Strategies or Programmes recommend an accreditation/certification system in good AMS practices in Primary Care? \* Yes, but only for prescribers Yes, but only for ASP teams Yes, but only for Centres (Primary Care facilities) Yes, all the above No

I don't know/unclear in documentation

### Food for thought

be included in the final common European framework for Primary Care ASP? *		
	Are there any questions missing that should be considered or any additional information you would like to share? *	

### **End of the survey**

You have reached the end of the survey.

Thank you for your valuable input and participation. We look forward to working together to develop a comprehensive AMS framework for Primary Care across Europe.

Your responses will help us prepare for the WS and ensure meaningful discussions.
